Hittite Microwave Products from Analog Devices Now Available Through ADI's Worldwide Sales Distribution Network

ADI franchised distributors now carry more than 1,000 Hittite products from Analog Devices' high performance portfolio. These RF, microwave, millimeter-wave ICs, and module solutions span the entire frequency spectrum to 110 GHz from antenna to bits and back.

NORWOOD, Mass.--(BUSINESS WIRE)-- [Analog Devices, Inc.](http://www.analog.com) (NASDAQ: ADI), a global leader in high-performance semiconductors for signal processing applications, announced today that its complete RF and microwave portfolio, including the Hittite Microwave Products from Analog Devices, is now available for sale through the company's extensive distribution network.

ADI's distribution network includes a variety of channel partners worldwide, consisting of: global distribution partners; a vast range of regional partners located throughout the Americas, Europe, China and Asia Pacific; and catalog distributors. Over the past few months, these partners have been fully trained and received RF and microwave accreditation to ADI standards on the Hittite Microwave products. A complete list of ADI's partners can be found at <http://www.analog.com/salesdir/continent.asp>.

With the integration of Hittite Microwave products into ADI's supply chain management, customer service, sales operations and worldwide distribution network, customers can now work through these channel partners for virtually all their high-frequency needs with the logistics, technical training, and customer service assurances of an ADI authorized distributor.

"We have been working diligently over the past few months to integrate Hittite Microwave products into ADI's world-class supply chain management infrastructure, which includes a distribution network that has a long history of providing customers with high levels of service and support," said Thomas Wessel, senior vice president, Worldwide Sales & Marketing. "More customers are designing RF and microwave capabilities into their applications, and from the most advanced aerospace and defense systems to emerging automotive, healthcare and instrumentation applications, we are investing in the technology, tools, and support they need to drive innovation and fast time to market."

ADI is the broadest supplier to cover the entire signal chain, from antenna to bits and back, across the entire frequency spectrum up to 110 GHz. Complemented by the world's leading data converters, ADI's RF, microwave and millimeter-wave portfolio includes more than 2,000 high-performance products, from functional blocks to highly-integrated solutions, development platforms and modules.

About Analog Devices, Inc.

Innovation, performance, and excellence are the cultural pillars on which Analog Devices has built one of the longest standing, highest growth companies within the technology sector. Acknowledged industry-wide as the world leader in data conversion and signal conditioning technology, Analog Devices serves over 100,000 customers, representing virtually all types of electronic equipment. Analog Devices is headquartered in Norwood, Massachusetts, with design and manufacturing facilities throughout the world. Analog Devices is included in the S&P 500 Index. <http://www.analog.com>
