QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15 (d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended January 30, 2010

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15 (d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File No. 1-7819

Analog Devices, Inc.

(Exact name of registrant as specified in its charter)

Massachusetts

(State or other jurisdiction of
incorporation or organization)

04-2348234

(I.R.S. Employer
Identification No.)

One Technology Way, Norwood, MA

(Address of principal executive offices)

02062-9106

(Zip Code)

(781) 329-4700

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15 (d) of the Securities Exchange Act of 1934 during the preceding 12 months (or such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. YES NO

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files.) YES NO

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer

Accelerated filer

Non-accelerated filer

Smaller reporting company

(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act) YES NO

As of January 30, 2010 there were 297,690,739 shares of Common Stock, \$0.16 2/3 par value per share, outstanding.

[Table of Contents](#)

ANALOG DEVICES, INC.
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
FOR THE THREE MONTHS ENDED JANUARY 30, 2010
(all tabular amounts in thousands except per share amounts and percentages)

Note 1 — Basis of Presentation

In the opinion of management, the information furnished in the accompanying condensed consolidated financial statements reflects all normal recurring adjustments that are necessary to fairly state the results for these interim periods and should be read in conjunction with the Company's Annual Report on Form 10-K for the fiscal year ended October 31, 2009 and related notes. The results of operations for the interim period shown in this report are not necessarily indicative of the results that may be expected for the fiscal year ending October 30, 2010 or any future period.

The Company sold its baseband chipset business and related support operations (Baseband Chipset Business) to MediaTek Inc. and sold its CPU voltage regulation and PC thermal monitoring business to certain subsidiaries of ON Semiconductor Corporation during the first quarter of fiscal 2008. The Company has reflected the financial results of these businesses as discontinued operations in the consolidated statements of income for all periods presented. The assets and liabilities of these businesses are reflected as assets and liabilities of discontinued operations in the consolidated balance sheet as of October 31, 2009.

The Company has a 52-53 week fiscal year that ends on the Saturday closest to the last day in October. Fiscal 2010 and fiscal 2009 are 52-week fiscal years. Certain amounts reported in previous years have been reclassified to conform to the fiscal 2010 presentation. Such reclassified amounts were immaterial.

Note 2 — Revenue Recognition

Revenue from product sales to customers is generally recognized when title passes, which for shipments to certain foreign countries is subsequent to product shipment. Title for these shipments ordinarily passes within a week of shipment. A reserve for sales returns and allowances for customers is recorded based on historical experience or specific identification of an event necessitating a reserve.

In all regions of the world, the Company defers revenue and the related cost of sales on shipments to distributors until the distributors resell the products to their customers. Therefore, the Company's product revenue fully reflects end customer purchases and is not impacted by distributor inventory levels. Sales to distributors are made under agreements that allow distributors to receive price adjustment credits, as discussed below, and to return qualifying products for credit, as determined by the Company, in order to reduce the amounts of slow-moving, discontinued or obsolete product from their inventory. These agreements limit such returns to a certain percentage of the value of the Company's shipments to that distributor during the prior quarter. In addition, distributors are allowed to return unsold products if the Company terminates the relationship with the distributor.

Distributors are granted price-adjustment credits related to many of their sales to their customers. Price adjustment credits are granted when the distributor's standard cost (i.e., the Company's sales price to the distributor) does not provide the distributor with an appropriate margin on its sales to its customers. As distributors negotiate selling prices with their customers, the final sales price agreed to with the customer will be influenced by many factors, including the particular product being sold, the quantity ordered, the particular customer, the geographic location of the distributor, and the competitive landscape. As a result, the distributor may request and receive a price adjustment credit from the Company to allow the distributor to earn an appropriate margin on the transaction.

Distributors are also granted price adjustment credits in the event of a price decrease subsequent to the date the product was shipped and billed to the distributor. Generally, the Company will provide a credit equal to the difference between the price paid by the distributor (less any prior credits on such products) and the new price for the product multiplied by the quantity of such product in the distributor's inventory at the time of the price decrease.

Given the uncertainties associated with the levels of price adjustment credits to be granted to distributors, the sales price to the distributor is not fixed or determinable until the distributor resells the products to their customers. Therefore, the Company defers revenue recognition from sales to distributors until the distributors have sold the products to their customers.

[Table of Contents](#)

Title to the inventory transfers to the distributor at the time of shipment or delivery to the distributor, and payment from the distributor is due in accordance with the Company's standard payment terms. These payment terms are not contingent upon the distributors' sale of the products to their customers. Upon title transfer to distributors, inventory is reduced for the cost of goods shipped, the margin (sales less cost of sales) is recorded as "deferred income on shipments to distributors, net" and an account receivable is recorded.

The deferred costs of sales to distributors have historically had very little risk of impairment due to the margins the Company earns on sales of its products and the relatively long life-cycle of the Company's products. Product returns from distributors that are ultimately scrapped have historically been immaterial. In addition, price protection and price adjustment credits granted to distributors historically have not exceeded the margins the Company earns on sales of its products. The Company continuously monitors the level and nature of product returns and is in continuous contact with the distributors to ensure reserves are established for all known material issues.

As of January 30, 2010 and October 31, 2009, the Company had gross deferred revenue of \$253.3 million and \$230.8 million, respectively, and gross deferred cost of sales of \$76.3 million and \$81.5 million, respectively. Deferred income on shipments to distributors as of January 30, 2010 was higher than the amount as of October 31, 2009 by \$28 million, primarily as a result of the Company's shipments to its distributors in the first quarter of fiscal 2010 exceeding the distributors' sales to their customers during this same time period.

Shipping costs are charged to cost of sales as incurred.

The Company generally offers a 12-month warranty for its products. The Company's warranty policy provides for replacement of the defective product. Specific accruals are recorded for known product warranty issues. Product warranty expenses during either of the three-month periods ended January 30, 2010 and January 31, 2009 were not material.

Note 3 — Stock-Based Compensation

Grant-Date Fair Value — The Company uses the Black-Scholes option pricing model to calculate the grant-date fair value of an award. Information pertaining to the Company's stock option awards and the related estimated weighted-average assumptions to calculate the fair value of stock options granted during the three-month periods ended January 30, 2010 and January 31, 2009 are as follows:

Stock Options	Three Months Ended	
	January 30, 2010	January 31, 2009
Options granted (in thousands)	1,812	5,420
Weighted-average exercise price per share	\$31.55	\$19.56
Weighted-average grant-date fair value per share	\$ 7.80	\$ 7.47
Assumptions:		
Weighted-average expected volatility	31.43%	59.5%
Weighted-average expected term (in years)	5.3	5.3
Risk-free interest rate	2.6%	1.7%
Expected dividend yield	2.5%	4.1%

Expected volatility — The Company is responsible for estimating volatility and has considered a number of factors, including third-party estimates, when estimating volatility. The Company currently believes that the exclusive use of implied volatility results in the best estimate of the grant-date fair value of employee stock options because it reflects the market's current expectations of future volatility. In evaluating the appropriateness of exclusively relying on implied volatility, the Company concluded that: (1) options in the Company's common stock are actively traded with sufficient volume on several exchanges; (2) the market prices of both the traded options and the underlying shares are measured at a similar point in time to each other and on a date close to the grant date of the employee share options; (3) the traded options have exercise prices that are both near-the-money and close to the exercise price of the employee share options; and (4) the maturities of the traded options used to estimate volatility are at least one year.

Expected term — The Company uses historical employee exercise and option expiration data to estimate the expected term assumption for the Black-Scholes grant-date valuation. The Company believes that this historical data is currently the best estimate of the expected term of a new option, and that generally its employees exhibit similar exercise behavior.

[Table of Contents](#)

Risk-free interest rate — The yield on zero-coupon U.S. Treasury securities for a period that is commensurate with the expected term assumption is used as the risk-free interest rate.

Expected dividend yield — Expected dividend yield is calculated by annualizing the cash dividend declared by the Company's Board of Directors for the current quarter and dividing that result by the closing stock price on the date of grant. Until such time as the Company's Board of Directors declares a cash dividend for an amount that is different from the current quarter's cash dividend, the current dividend will be used in deriving this assumption. Cash dividends are not paid on options, restricted stock or restricted stock units.

Stock-Based Compensation Expense

The amount of stock-based compensation expense recognized during a period is based on the value of the awards that are ultimately expected to vest. Forfeitures are estimated at the time of grant and revised, if necessary, in subsequent periods if actual forfeitures differ from those estimates. The term "forfeitures" is distinct from "cancellations" or "expirations" and represents only the unvested portion of the surrendered stock-based award. Based on an analysis of its historical forfeitures, the Company has applied an annual forfeiture rate of 4.3% to all unvested stock-based awards as of January 30, 2010. The rate of 4.3% represents the portion that is expected to be forfeited each year over the vesting period. This analysis will be re-evaluated quarterly and the forfeiture rate will be adjusted as necessary. Ultimately, the actual expense recognized over the vesting period will only be for those awards that vest.

Stock-Based Compensation Activity

A summary of the activity under the Company's stock option plans as of January 30, 2010 and changes during the three-month period then ended is presented below:

Activity during the Three Months Ended January 30, 2010	Options Outstanding (in thousands)	Weighted-Average Exercise Price Per Share	Weighted-Average Remaining Contractual Term in Years	Aggregate Intrinsic Value
Options outstanding at October 31, 2009	52,463	\$29.71		
Options granted	1,812	\$31.55		
Options exercised	(6,609)	\$28.38		
Options forfeited	(359)	\$27.91		
Options expired	(413)	\$38.68		
Options outstanding at January 30, 2010	<u>46,894</u>	\$29.91	5.2	\$79,510
Options exercisable at January 30, 2010	<u>21,026</u>	\$33.03	4.1	\$46,690
Options vested or expected to vest at January 30, 2010 (1)	<u>45,003</u>	\$30.03	5.1	\$76,261

(1) In addition to the vested options, the Company expects a portion of the unvested options to vest at some point in the future. Options expected to vest is calculated by applying an estimated forfeiture rate to the unvested options.

During the three months ended January 30, 2010 and January 31, 2009, the total intrinsic value of options exercised (i.e., the difference between the market price at exercise and the price paid by the employee to exercise the options) was \$13.2 million and \$0.1 million, respectively, and the total amount of proceeds received from exercise of these options was \$187.6 million and \$1 million, respectively. Proceeds from stock option exercises pursuant to employee stock plans in the Company's statement of cash flows during the three months ended January 30, 2010 and January 31, 2009 of \$163.5 million and \$0.8 million, respectively, is net of the value of shares surrendered by employees in certain limited circumstances to satisfy the exercise price of options, and to satisfy employee tax obligations upon vesting of restricted stock or restricted stock units and in connection with the exercise of stock options granted to the Company's employees under the Company's equity compensation plans. The withholding amount is based on the Company's minimum statutory withholding requirement. The total grant-date fair value of stock options that vested during the three months ended January 30, 2010 and January 31, 2009 was approximately \$31.4 million and \$70.5 million, respectively.

A summary of the Company's restricted stock and restricted stock unit award activity as of January 30, 2010 and changes during the quarter then ended is presented below:

[Table of Contents](#)

Activity during the Three Months Ended January 30, 2010	Restricted Shares and/ or Units Outstanding	Weighted- Average Grant Date Fair Value Per Share
Non-vested shares outstanding at October 31, 2009	135	\$22.19
Awards and/or units granted	1,128	\$28.93
Restrictions lapsed	(4)	\$31.27
Forfeited	(3)	\$29.88
Non-vested shares outstanding at January 30, 2010	<u>1,256</u>	\$28.20

As of January 30, 2010, there was \$136 million (before tax consideration) of total unrecognized compensation cost related to unvested share-based awards, including stock options, restricted stock and restricted stock units. That cost is expected to be recognized over a weighted-average period of 1.7 years.

Note 4 — Comprehensive Income

Components of comprehensive income include net income and certain transactions that have generally been reported in the consolidated statement of shareholders' equity and consist of the following:

	Three Months Ended	
	January 30, 2010	January 31, 2009
Income from continuing operations, net of tax	\$ 119,600	\$ 24,585
Foreign currency translation adjustments	2,132	(1,372)
Change in unrealized holding gains (losses) (net of taxes of \$5 and \$296, respectively) on securities classified as short-term investments	36	(2,082)
Change in unrealized holding losses (net of taxes of \$9 and \$88, respectively) on securities classified as other investments	(17)	(163)
Change in unrealized (losses) gains (net of taxes of \$459 and \$1,042, respectively) on derivative instruments designated as cash flow hedges	(7,005)	8,221
Pension plans		
Prior service cost	(1)	1
Transition asset (obligation)	2	(4)
Net actuarial gain (loss)	300	(676)
Other comprehensive (loss) income	(4,553)	3,925
Comprehensive income from continuing operations	115,047	28,510
Income from discontinued operations, net of tax	859	364
Comprehensive income	<u>\$ 115,906</u>	<u>\$ 28,874</u>

The components of accumulated other comprehensive income at January 30, 2010 and October 31, 2009 consisted of the following:

	January 30, 2010	October 31, 2009
Foreign currency translation adjustment	\$ (5,344)	\$ (7,476)
Unrealized gain on available-for-sale securities	880	948
Unrealized losses on available-for-sale securities	(505)	(592)
Unrealized (losses) gains on derivative instruments	(1,396)	5,609
Pension plans		
Prior service cost	(1)	—
Transition obligation	(47)	(49)
Net actuarial loss	(8,388)	(8,688)
Total accumulated other comprehensive loss	<u>\$ (14,801)</u>	<u>\$ (10,248)</u>

The aggregate fair value of investments with unrealized losses as of January 30, 2010 and October 31, 2009 was \$479.8 million and \$535.3 million, respectively. These unrealized losses are all related to commercial paper that earns lower interest rates than current market rates. None of these investments have been in a loss position for more than twelve months.

Note 5 — Earnings Per Share

Basic earnings per share is computed based only on the weighted average number of common shares outstanding during the period. Diluted earnings per share is computed using the weighted average number of common shares outstanding during the period, plus the dilutive effect of potential future issuances of common stock relating to stock option programs and other potentially dilutive securities using the treasury stock method. In calculating diluted earnings per share, the dilutive effect of stock options is computed using the average market price for the respective period. In addition, the assumed proceeds under the treasury stock method include the average unrecognized compensation expense of stock options, restricted stock, and RSU's that are in-the-money. This results in the "assumed" buyback of additional shares, thereby reducing the dilutive impact of stock options. Potential shares related to certain of the Company's outstanding stock options were excluded because they were anti-dilutive. Those potential shares, determined based on the weighted average exercise prices during the respective years, related to the Company's outstanding stock options could be dilutive in the future.

	Three Months Ended	
	January 30, 2010	January 31, 2009
Income from continuing operations, net of tax	\$ 119,600	\$ 24,585
Total income from discontinued operations, net of tax	859	364
Net income	<u>\$ 120,459</u>	<u>\$ 24,949</u>
Basic shares:		
Weighted-average shares outstanding	<u>295,611</u>	<u>291,187</u>
Earnings per share-basic:		
Income from continuing operations, net of tax	\$ 0.40	\$ 0.08
Total income from discontinued operations, net of tax	0.00	0.00

Closure of Wafer Fabrication Facility in Sunnyvale

The Company ceased production at its California wafer fabrication facility in November 2006. The Company has been paying the related lease obligation costs on a monthly basis over the remaining lease term, which expires in March 2010. A one-time settlement charge of \$0.4 million was recorded in the first quarter of fiscal 2010 related to the termination of the lease. The Company does not expect to incur any additional charges related to this action.

Consolidation of a Wafer Fabrication Facility in Limerick

In fiscal 2007, the Company recorded a special charge of \$13.7 million as a result of its decision to only use eight-inch technology at its wafer fabrication facility in Limerick. Certain manufacturing processes and products produced on the Limerick facility's six-inch production line have transitioned to the Company's existing eight-inch production line in Limerick while others have transitioned to external foundries. The charge was for severance and fringe benefit costs recorded in accordance with the Company's ongoing benefit plan for 150 manufacturing employees associated with this action. As of January 30, 2010, the Company still employed 1 of the 150 employees included in this action. The employee must continue to be employed by the Company until his employment is involuntarily terminated in order to receive the severance benefit. During fiscal 2008, the Company recorded an additional charge of \$1.5 million related to this action, of which \$1.2 million was an adjustment to the original estimate of the severance costs and \$0.3 million was for clean-up and closure costs that were expensed as incurred. During fiscal 2009, the Company recorded additional charges of \$1.2 million for clean-up and closure costs that were expensed as incurred. The production in the six-inch wafer fabrication facility ceased during the fourth quarter of fiscal 2009. The Company does not expect to incur any further charges related to this action.

Reduction of Operating Costs

During the fourth quarter of fiscal 2008, in order to further reduce its operating cost structure, the Company recorded a special charge of \$1.6 million for severance and fringe benefit costs recorded in accordance with its ongoing benefit plan or statutory requirements at foreign locations for 19 engineering, selling, marketing, general and administrative employees. The Company terminated the employment of all employees associated with this charge and is paying amounts owed to employees for severance as income continuance.

During fiscal 2009, the Company recorded an additional charge of \$30.3 million related to this cost reduction action. Approximately \$2.1 million of this charge was for lease obligation costs for facilities that the Company ceased using during the first quarter of fiscal 2009; approximately \$0.9 million was for the write-off of property, plant and equipment; and approximately \$0.8 million was for contract termination costs and for clean-up and closure costs that were expensed as

[Table of Contents](#)

incurred. The remaining \$26.5 million related to the severance and fringe benefit costs recorded in accordance with the Company's ongoing benefit plan or statutory requirements at foreign locations for 245 manufacturing employees and 302 engineering and SMG&A employees. As of January 30, 2010, the Company still employed 3 of the 547 employees included in this cost reduction action. These employees must continue to be employed by the Company until their employment is involuntarily terminated in order to receive the severance benefit.

During the first quarter of fiscal 2010, the Company recorded an additional charge of \$11.4 million related to the further reduction of its operating cost structure. Approximately \$10.9 million of this charge was for severance and fringe benefit costs recorded in accordance with the Company's ongoing benefit plan or statutory requirements at foreign locations for 149 engineering and SMG&A employees. As of January 30, 2010, the Company still employed 86 of the 149 employees included in this cost reduction action. These employees must continue to be employed by the Company until their employment is involuntarily terminated in order to receive the severance benefit. Approximately \$0.5 million of the charge relates to the Company's decision to abandon efforts to develop a particular expertise in power management, resulting in the impairment of related intellectual property.

Closure of a Wafer Fabrication Facility in Cambridge

During the first quarter of fiscal 2009, the Company recorded a special charge of \$22.1 million as a result of its decision to consolidate its Cambridge, Massachusetts wafer fabrication facility into its existing Wilmington, Massachusetts facility. In connection with the anticipated closure of this facility, the Company evaluated the recoverability of the facility's manufacturing assets and concluded that there was an impairment of approximately \$12.9 million based on the revised period of intended use. The remaining \$9.2 million was for severance and fringe benefit costs recorded in accordance with the Company's ongoing benefit plan for 175 manufacturing employees and 9 SMG&A employees associated with this action.

The Company finished production in the Cambridge wafer fabrication facility and began clean-up activities during the fourth quarter of fiscal 2009. During the fourth quarter of fiscal 2009, the Company reversed approximately \$1.8 million of its severance accrual. The accrual reversal was required because 51 employees either voluntarily left the Company or found alternative employment within the Company. In addition, the Company recorded a special charge of approximately \$1.7 million for the impairment of manufacturing assets that were originally going to be moved to the Company's other wafer fabrication facilities but are no longer needed at those facilities and therefore have no future use. The Company also recorded a special charge of \$0.1 million for clean-up costs as the Company began its cleanup of the Cambridge wafer fabrication facility at the end of the fourth quarter of fiscal 2009. As of January 30, 2010, the Company still employed 9 of the employees included in this action. These employees must continue to be employed by the Company until their employment is involuntarily terminated in order to receive the severance benefit.

During the first quarter of fiscal 2010, the Company recorded an additional charge of \$4.7 million related to this cost reduction action. Approximately \$3.4 million of the charge related to lease obligation costs for the Cambridge wafer fabrication facility, which the Company ceased using in the first quarter of fiscal 2010; the remaining \$1.3 million of the charge related to cleanup and closure costs.

Note 7 — Segment Information

The Company operates and tracks its results in one reportable segment based on the aggregation of five operating segments. The Company designs, develops, manufactures and markets a broad range of integrated circuits. The Chief Executive Officer has been identified as the Chief Operating Decision Maker.

Revenue Trends by End Market

The categorization of revenue by end market is determined using a variety of data points including the technical characteristics of the product, the "sold to" customer information, the "ship to" customer information and the end customer product or application into which the Company's product will be incorporated. As data systems for capturing and tracking this data evolve and improve, the categorization of products by end market can vary over time. When this occurs, the Company reclassifies revenue by end market for prior periods. Such reclassifications typically do not materially change the sizing of, or the underlying trends of results within, each end market.

[Table of Contents](#)

	Three Months Ended January 30, 2010			Three Months Ended January 31, 2009	
	Revenue	% of Revenue	Y/Y%	Revenue	% of Revenue
Industrial	\$ 259,962	43%	19%	\$ 218,662	46%
Automotive	74,643	12%	81%	41,246	9%
Consumer	117,703	20%	53%	76,702	16%
Communications	135,519	22%	8%	125,708	26%
Computer	15,156	3%	6%	14,251	3%
Total revenue	\$ 602,983	100%	27%	\$ 476,569	100%

Revenue Trends by Product Type

The following table summarizes revenue by product categories. The categorization of the Company's products into broad categories is based on the characteristics of the individual products, the specification of the products and in some cases the specific uses that certain products have within applications. The categorization of products into categories is therefore subject to judgment in some cases and can vary over time. In instances where products move between product categories, the Company reclassifies the amounts in the product categories for all prior periods. Such reclassifications typically do not materially change the sizing of, or the underlying trends of results within, each product category.

	Three Months Ended January 30, 2010			Three Months Ended January 31, 2009	
	Revenue	% of Revenue*	Y/Y%	Revenue	% of Revenue
Converters	\$ 317,403	53%	25%	\$ 252,925	53%
Amplifiers / Radio frequency	148,066	25%	13%	130,716	27%
Other analog	46,279	8%	95%	23,754	5%
Subtotal analog signal processing	511,748	85%	26%	407,395	85%

Total analog products	\$ 550,456	91%	27%	\$ 433,133	91%
Digital signal processing	\$ 52,527	9%	21%	\$ 43,436	9%
Total revenue	\$ 602,983	100%	27%	\$ 476,569	100%

* The sum of the individual percentages may not equal the total due to rounding.

Revenue Trends by Geographic Region

Revenue by geographic region, based upon customer location, for the three-month periods ended January 30, 2010 and January 31, 2009 was as follows:

Region	Three Months Ended	
	January 30, 2010	January 31, 2009
United States	\$ 116,963	\$ 107,298
Rest of North and South America	29,879	19,332
Europe	142,066	127,745
Japan	110,350	72,733
China	106,522	89,712
Rest of Asia	97,203	59,749
Total revenue	\$ 602,983	\$ 476,569

[Table of Contents](#)

In the three-month period ended January 30, 2010, the predominant countries comprising “Rest of North and South America” are Canada and Mexico; the predominant countries comprising “Europe” are Germany, Sweden, France and Holland; and the predominant countries comprising “Rest of Asia” are Taiwan and Korea.

In the three-month period ended January 31, 2009 the predominant countries comprising “Rest of North and South America” are Canada and Mexico; the predominant countries comprising “Europe” are Germany, Sweden, France and Italy; and the predominant countries comprising “Rest of Asia” are Taiwan and Singapore.

Note 8 — Fair Value

The Company defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The Company applies the following fair value hierarchy, which prioritizes the inputs used to measure fair value into three levels and bases the categorization within the hierarchy upon the lowest level of input that is available and significant to the fair value measurement. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements).

Level 1 — Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date.

Level 2 — Level 2 inputs are inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly. If the asset or liability has a specified (contractual) term, a Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 — Level 3 inputs are unobservable inputs for the asset or liability in which there is little, if any, market activity for the asset or liability at the measurement date. As of January 30, 2010, the Company held no assets or liabilities valued using Level 3 inputs.

The table below sets forth by level the Company’s financial assets and liabilities that were accounted for at fair value as of January 30, 2010. The table does not include cash on hand and also does not include assets and liabilities that are measured at historical cost or any basis other than fair value.

	Portion of Carrying Value Measured at Fair Value January 30, 2010	Fair Value measurement at Reporting Date using:	
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)
Assets			
Cash Equivalents:			
Institutional money market funds	\$ 783,419	\$ 783,419	\$ —
Corporate Obligations	104,944	—	104,944
Euro time deposits	7,004	—	7,004
Short-term investments:			
Corporate obligations	1,264,696	—	1,264,696
Other Assets:			
Forward foreign currency exchange contracts (1)	121	—	121
Deferred compensation investments	8,646	8,646	—
Other investments	1,459	1,459	—
Interest rate swap agreements	7,829	—	7,829
Total assets measured at fair value	\$ 2,178,118	\$ 793,524	\$ 1,384,594
Liabilities			
Forward foreign currency exchange contracts (2)	\$ 986	—	\$ 986
Long-term debt	381,425	—	381,425
Total liabilities measured at fair value	\$ 382,411	\$ —	\$ 382,411

(1) The Company has a master netting arrangement by counterparty with respect to derivative contracts. Contracts in a liability position of \$1.6 million have been netted against contracts in an asset position in the Condensed Consolidated Balance Sheets.

(2) The Company has a master netting arrangement by counterparty with respect to derivative contracts. Contracts in an asset position of \$1.0 million have been netted against contracts in a liability position in the Condensed Consolidated Balance Sheets.

[Table of Contents](#)

The following methods and assumptions were used by the Company in estimating its fair value disclosures for financial instruments:

Cash equivalents and short-term investments — These investments are adjusted to fair value based on quoted market prices or are determined using a yield curve model based on current market rates.

Deferred compensation plan investments and other investments — The fair value of these investments is based on quoted market prices.

Long-term debt — The fair value of long-term debt is based on quoted market values.

Interest rate swap agreements — The fair value of interest rate swap agreements is based on quotes received from third party banks. These values represent the estimated amount the Company would receive or pay to terminate the agreements taking into consideration current interest rates as well as the creditworthiness of the counterparty.

Forward foreign currency exchange contracts — The estimated fair value of forward foreign currency exchange contracts, which includes derivatives that are accounted for as cash flow hedges and those that are not designated as cash flow hedges, is based on the estimated amount the Company would receive to sell these agreements at the reporting date taking into consideration current interest rates as well as the creditworthiness of the counterparty for assets and our creditworthiness for liabilities.

Note 9 — Derivatives

Foreign Exchange Exposure Management — The Company enters into forward foreign currency exchange contracts to offset certain operational and balance sheet exposures from the impact of changes in foreign currency exchange rates. Such exposures result from the portion of the Company's operations, assets and liabilities that are denominated in currencies other than the U.S. dollar, primarily the Euro; other exposures include the Philippine Peso and the British Pound. These foreign currency exchange contracts are entered into to support transactions made in the normal course of business, and accordingly, are not speculative in nature. The contracts are for periods consistent with the terms of the underlying transactions, generally one year or less. Hedges related to anticipated transactions are designated and documented at the inception of the respective hedges as cash flow hedges and are evaluated for effectiveness monthly. Derivative instruments are employed to eliminate or minimize certain foreign currency exposures that can be confidently identified and quantified. As the terms of the contract and the underlying transaction are matched at inception, forward contract effectiveness is calculated by comparing the change in fair value of the contract to the change in the forward value of the anticipated transaction, with the effective portion of the gain or loss on the derivative instrument reported as a component of accumulated other comprehensive (loss) income (OCI) in shareholders' equity and reclassified into earnings in the same period during which the hedged transaction affects earnings. Any residual change in fair value of the instruments, or ineffectiveness, is recognized immediately in other income/expense. Additionally, the Company enters into forward foreign currency contracts that economically hedge the gains and losses generated by the remeasurement of certain recorded assets and liabilities in a non-functional currency. Changes in the fair value of these undesignated hedges are recognized in other income/expense immediately as an offset to the changes in the fair value of the asset or liability being hedged. As of January 30, 2010, the total notional amount of these undesignated hedges was \$76 million. The fair value of these hedging instruments in the Company's condensed consolidated balance sheet as of January 30, 2010 was \$0.3 million.

Interest Rate Exposure Management — On June 30, 2009, the Company entered into interest rate swap transactions related to its outstanding 5% senior unsecured notes where the Company swapped the notional amount of its \$375 million of fixed rate debt at 5.0% into floating interest rate debt through July 1, 2014. Under the terms of the swaps, the Company will (i) receive on the \$375 million notional amount a 5.0% annual interest payment that is paid in two installments on the 1st of every January and July, commencing January 1, 2010 through and ending on the maturity date; and (ii) pay on the \$375 million notional amount an annual three-month LIBOR plus 2.05% (2.30% as of January 30, 2010) interest payment, payable in four installments on the 1st of every January, April, July and October, commencing on October 1, 2009 and ending on the maturity date. The LIBOR based rate is set quarterly three months prior to the date of the interest payment. The Company designated these swaps as fair value hedges. The fair value of the swaps at inception were zero and subsequent changes in the fair value of the interest rate swaps were reflected in the carrying value of the interest rate swaps on the balance sheet. The carrying value of the debt on the

[Table of Contents](#)

balance sheet was adjusted by an equal and offsetting amount. The gain or loss on the hedged item (that is fixed-rate borrowings) attributable to the hedged benchmark interest rate risk and the offsetting gain or loss on the related interest rate swaps as of January 30, 2010 is as follows:

<u>Income Statement Classification</u>	<u>Gain/(Loss) on Swaps</u>	<u>Gain/(Loss) on Note</u>	<u>Net Income Effect</u>
Other income	\$7,829	\$(7,829)	\$—

The amounts earned and owed under the swap agreements are accrued each period and are reported in interest expense. There was no ineffectiveness recognized in any of the periods presented.

The market risk associated with the Company's derivative instruments results from currency exchange rate or interest rate movements that are expected to offset the market risk of the underlying transactions, assets and liabilities being hedged. The counterparties to the agreements relating to the Company's derivative instruments consist of a number of major international financial institutions with high credit ratings. The Company does not believe that there is significant risk of nonperformance by these counterparties because the Company continually monitors the credit ratings of such counterparties. Furthermore, none of the Company's derivative transactions are subject to collateral or other security arrangements and none contain provisions that are dependent on the Company's credit ratings from any credit rating agency. While the contract or notional amounts of derivative financial instruments provide one measure of the volume of these transactions, they do not represent the amount of the Company's exposure to credit risk. The amounts potentially subject to credit risk (arising from the possible inability of counterparties to meet the terms of their contracts) are generally limited to the amounts, if any, by which the counterparties' obligations under the contracts exceed the obligations of the Company to the counterparties. As a result of the above considerations, the Company does not consider the risk of counterparty default to be significant.

The Company records the fair value of its derivative financial instruments in the consolidated financial statements in other current assets, other assets or accrued liabilities, depending on their net position, regardless of the purpose or intent for holding the derivative contract. Changes in the fair value of the derivative financial instruments are either recognized periodically in earnings or in shareholders' equity as a component of OCI. Changes in the fair value of cash flow hedges are recorded in OCI and reclassified into earnings when the underlying contract matures. Changes in the fair values of derivatives not qualifying for hedge accounting are reported in earnings as they occur.

The total notional amount of derivative instruments designated as hedging instruments as of January 30, 2010 is as follows: \$375 million of interest rate swap agreements accounted for as fair value hedges, and \$161 million of cash flow hedges denominated in Euros, British Pounds and Philippine Pesos. The fair value of these hedging instruments in the Company's condensed consolidated balance sheet as of January 30, 2010 was as follows:

	<u>Balance Sheet Location</u>	<u>Fair Value</u>
Interest rate swap agreements	Other Assets	\$7,829
Forward foreign currency exchange contracts	Prepaid expenses and other current assets	\$ 121
	Accrued liabilities	\$ 986

The effect of derivative instruments designated as cash flow hedges on our condensed consolidated statement of income for the three months ended January 30, 2010 was as follows:

	<u>Three Months Ended January 30, 2010</u>
Loss recognized in OCI on derivative, net of tax of \$1,417	\$(9,402)
Gain reclassified from OCI into income, net of tax of \$361	\$ 2,397

The amounts reclassified into earnings before tax are recognized in cost of sales and operating expenses as follows: for the three-month period ended January 30, 2010, \$1.4 million in cost of sales, and \$1.4 million in selling, marketing, general and administrative. All derivative gains included in OCI will be reclassified into earnings within the next 12 months. There was no ineffectiveness recognized in the three months ended January 30, 2010.

Note 10 — Goodwill and Intangible Assets*Goodwill*

The Company annually evaluates goodwill for impairment as well as whenever events or changes in circumstances suggest that the carrying value of goodwill may not be recoverable. The Company tests goodwill for impairment at the reporting unit level (operating segment or one level below an operating segment) on an annual basis in the fourth quarter or more frequently if indicators of impairment exist. The performance of the test involves a two-step process. The first step of the impairment test involves comparing the fair values of the applicable reporting units with their aggregate carrying values, including goodwill. The Company generally determines the fair value of its reporting units using the income approach methodology of valuation that includes the discounted cash flow method as well as other generally accepted valuation methodologies. If the carrying amount of a reporting unit exceeds the reporting unit's fair value, the Company performs the second step of the goodwill impairment test to determine the amount of impairment loss. The second step of the goodwill impairment test involves comparing the implied fair value of the affected reporting unit's goodwill with the carrying value of that goodwill. No impairment of goodwill resulted from the Company's most recent impairment evaluation of goodwill, which occurred in the fourth quarter of fiscal 2009. No impairment of goodwill resulted in any of the fiscal years presented. The Company's next annual impairment assessment will be made in the fourth quarter of fiscal 2010 unless indicators arise that would require the Company to reevaluate at an earlier date. The following table presents the changes in goodwill during the first three months of fiscal 2010:

	Three Months Ended January 30, 2010
Balance at beginning of period	\$ 250,881
Foreign currency translation adjustment	2,629
Balance at end of period	<u>\$ 253,510</u>

Intangible Assets

The Company reviews identified intangible assets for impairment whenever events or changes in circumstances indicate that the carrying value of assets may not be recoverable. Recoverability of these assets is measured by comparison of their carrying value to future undiscounted cash flows the assets are expected to generate over their remaining economic lives. If such assets are considered to be impaired, the impairment to be recognized in earnings equals the amount by which the carrying value of the assets exceeds their fair value determined by either a quoted market price, if any, or a value determined by utilizing a discounted cash flow technique.

Intangible assets, which will continue to be amortized, consisted of the following:

	<u>January 30, 2010</u>		<u>October 31, 2009</u>	
	Gross Carrying Amount	Accumulated Amortization	Gross Carrying Amount	Accumulated Amortization
Technology-based	\$ 40,224	\$ 36,692	\$ 39,924	\$ 34,213
Tradename	1,496	1,496	1,478	1,478
Customer Relationships	5,100	4,167	5,181	4,037
Other	6,603	6,603	6,582	6,582
Total	<u>\$ 53,423</u>	<u>\$ 48,958</u>	<u>\$ 53,165</u>	<u>\$ 46,310</u>

[Table of Contents](#)

Intangible assets are amortized on a straight-line basis over their estimated useful lives or on an accelerated method of amortization that is expected to reflect the estimated pattern of economic use. The remaining amortization expense will be recognized over a weighted-average period of approximately 1.3 years.

Amortization expense was \$1.8 million and \$2.0 million for the three-month periods ended January 30, 2010 and January 31, 2009, respectively.

The Company expects amortization expense for these intangible assets to be:

Fiscal Year	Amortization Expense
Remainder of 2010	\$3,116
2011	\$1,349

Note 11 — Pension Plans

The Company has various defined benefit pension and other retirement plans for certain non-U.S. employees that are consistent with local statutory requirements and practices. The Company's funding policy for its foreign defined benefit pension plans is consistent with the local requirements of each country. The plans' assets consist primarily of U.S. and non-U.S. equity securities, bonds, property and cash.

Net periodic pension cost of non-U.S. plans is presented in the following table:

	Three Months Ended	
	January 30, 2010	January 31, 2009
Service cost	\$ 1,507	\$ 1,552
Interest cost	2,464	2,301
Expected return on plan assets	(2,849)	(2,583)
Amortization of prior service cost	—	1
Amortization of initial net asset	(7)	(10)
Amortization of net gain	(24)	(125)
Net periodic pension cost	<u>\$ 1,091</u>	<u>\$ 1,136</u>

Pension contributions of \$23.2 million were made by the Company during the three months ended January 30, 2010. The Company presently anticipates contributing an additional \$6.1 million to fund its defined benefit pension plans in fiscal year 2010 for a total of \$29.3 million.

Note 12 — Revolving Credit Facility

As of January 30, 2010, the Company had \$2,179.0 million of cash and cash equivalents and short term investments, of which \$628 million was held in the United States. The balance of the Company's cash and cash equivalents and short term investments was held outside the United States in various foreign subsidiaries. As the Company intends to reinvest certain of its foreign earnings indefinitely, this cash is not available to meet certain of the Company's cash requirements in the United States, including for cash dividends and common stock repurchases. The Company entered into a five-year, \$165 million unsecured revolving credit facility with certain institutional lenders in May 2008. To date, the Company has not borrowed under this credit facility but the Company may borrow in the future and use the proceeds for support of commercial paper issuance, stock repurchases, dividend payments, acquisitions, capital expenditures, working capital and other lawful corporate purposes. Any advances under this credit agreement will accrue interest at rates that are equal to LIBOR plus a margin that is based on the Company's leverage ratio. The terms of this facility also include financial covenants that require the Company to maintain a minimum interest coverage ratio and not exceed a maximum leverage ratio. As of January 30, 2010, the Company is compliant with these covenants. The terms of the

facility also impose restrictions on the Company's ability to undertake certain transactions, to create certain liens on assets and to incur certain subsidiary indebtedness.

Note 13 — Long-Term Debt

On June 30, 2009, the Company issued \$375 million aggregate principal amount of 5.0% senior unsecured notes due July 1, 2014 (the Notes) with semi-annual fixed interest payments on January 1 and July 1 of each year, commencing January 1, 2010. The sale of the Notes was made pursuant to the terms of an underwriting agreement dated June 25, 2009 between the Company and Credit Suisse Securities (USA) LLC, as representative of the several underwriters named therein. The net proceeds of the offering were \$370.4 million, after issuing at a discount and deducting expenses, underwriting discounts and commissions, which will be amortized over the term of the Notes. The indenture governing the Notes contains covenants that may limit the Company's ability to: incur, create, assume or guarantee any debt for borrowed money secured by a lien upon a principal property; enter into sale and lease-back transactions with respect to a principal property; and consolidate with or merge into, or transfer or lease all or substantially all of its assets to, any other party.

On June 30, 2009, the Company entered into interest rate swap transactions where the Company swapped the notional amount of its \$375 million of fixed rate debt at 5.0% into floating interest rate debt through July 1, 2014. Under the terms of the swaps, the Company will (i) receive on the \$375 million notional amount a 5.0% annual interest payment that is paid in two installments on the 1st of every January and July, commencing January 1, 2010 through and ending on the maturity date; and (ii) pay on the \$375 million notional amount an annual three-month LIBOR plus 2.05% (2.30% as of January 30, 2010) interest payment, payable in four installments on the 1st of every January, April, July and October, commencing on October 1, 2009 and ending on the maturity date. The LIBOR based rate is set quarterly three months prior to the date of the interest payment. The Company designated these swaps as fair value hedges. The changes in the fair value of the interest rate swaps were reflected in the carrying value of the interest rate swaps in other assets on the balance sheet. The carrying value of the debt on the balance sheet was adjusted by an equal and offsetting amount.

Note 14 — Common Stock Repurchase

The Company's common stock repurchase program has been in place since August 2004. In the aggregate, the Board of Directors has authorized the Company to repurchase \$4 billion of the Company's common stock under the program. Under the program, the Company may repurchase outstanding shares of its common stock from time to time in the open market and through privately negotiated transactions. Unless terminated earlier by resolution of the Company's Board of Directors, the repurchase program will expire when the Company has repurchased all shares authorized under the program. As of January 30, 2010, the Company had repurchased a total of approximately 114.7 million shares of its common stock for approximately \$3,908.4 million under this program. An additional \$91.6 million remains available for repurchase of shares under the current authorized program. The repurchased shares are held as authorized but unissued shares of common stock. Any future common stock repurchases will be dependent upon several factors including the amount of cash available to the Company in the United States, and the Company's financial performance, outlook and liquidity. The Company also from time to time repurchases shares in settlement of employee tax withholding obligations due upon the vesting of restricted stock or restricted stock units, or in certain limited circumstances to satisfy the exercise price of options granted to the Company's employees under the Company's equity compensation plans.

Note 15 — Discontinued Operations

In November 2007, the Company entered into a purchase and sale agreement with certain subsidiaries of ON Semiconductor Corporation to sell the Company's CPU voltage regulation and PC thermal monitoring business which consisted of core voltage regulator products for the central processing unit in computing and gaming applications and temperature sensors and fan-speed controllers for managing the temperature of the central processing unit. During the first quarter of fiscal 2008, the Company completed the sale of this business for net cash proceeds of \$138 million, which was net of other cash payments of approximately \$1.4 million. The Company made final additional cash payments of approximately \$2.2 million in the second quarter of fiscal 2008. In connection with the purchase and sale agreement, \$7.5 million was placed into escrow and was excluded from the gain calculations. The Company recorded a pre-tax gain in the first quarter of fiscal 2008 of \$78 million, or \$43 million net of tax, which was recorded as a gain on sale of discontinued operations. During the third quarter of fiscal 2008, additional proceeds were released from escrow and an additional pre-tax gain of \$6.6 million, or \$3.8 million net of tax, was recorded as a gain on sale of discontinued operations. Additionally, at the time of the sale, the Company entered into a one-year manufacturing supply agreement with a subsidiary of ON Semiconductor Corporation for an additional \$37 million. The Company has allocated the proceeds from this arrangement based on the fair value of the two elements of this transaction: (i) the sale of a business and (ii) the obligation to manufacture product for a one-year period. As a result, \$85 million was recorded as a liability related to the manufacturing supply agreement, all of which has been utilized. The liability was included in current liabilities of discontinued operations on the Company's consolidated balance sheet. The Company recorded the

Table of Contents

revenue associated with this manufacturing supply agreement in discontinued operations. In the first quarter of fiscal 2010, additional proceeds \$1 million were released from escrow and \$0.6 million net of tax, was recorded as additional gain from the sale of discontinued operations.

In September 2007, the Company entered into a definitive agreement to sell its Baseband Chipset Business to MediaTek Inc. The decision to sell the Baseband Chipset Business was due to the Company's decision to focus its resources in areas where its signal processing expertise can provide unique capabilities and earn superior returns. On January 11, 2008, the Company completed the sale of its Baseband Chipset Business for net cash proceeds of \$269 million. The cash proceeds received were net of a refundable withholding tax of \$62 million and other cash payments of approximately \$9 million. The Company made additional cash payments of \$7.8 million during fiscal 2008, primarily related to transaction fees and retention payments to employees that transferred to MediaTek Inc. In connection with the purchase and sale agreement, \$10 million was placed into escrow and was excluded from the gain calculations. The Company recorded a pre-tax gain in fiscal 2008 of \$278 million, or \$202 million net of tax, which is recorded as a gain on sale of discontinued operations. The Company made additional cash payments of \$1.7 million during fiscal 2009 related to retention payments for employees who transferred to MediaTek Inc and for the reimbursement of intellectual property license fees incurred by MediaTek Inc. In the first quarter of fiscal 2010, the Company received cash proceeds of \$62 million as a result of the refund of the withholding tax and also recorded an additional gain on sale of \$0.3 million, or \$0.2 million net of tax, due to the settlement of certain items at less than the amounts accrued. The Company may receive additional proceeds of up to \$10 million, currently held in escrow, upon the resolution of certain contingent items, which would be recorded as additional gain from the sale of discontinued operations.

The Company received additional amounts under various transition service agreements entered into in connection with these dispositions. The transition service agreements included manufacturing, engineering support and certain human resource services and information technology systems support. At the time of the disposition, the Company evaluated the nature of the transition services and concluded the services would be primarily completed within the one-year assessment period, and the Company did not have the ability to exert significant influence over the disposed businesses' operating and financial policies. Accordingly, the Company concluded that it did not have a significant continuing involvement with the disposed businesses and has presented the disposition of these businesses as discontinued operations.

The following amounts related to the CPU voltage regulation and PC thermal monitoring and baseband chipset businesses have been segregated from continuing operations and reported as discontinued operations. These amounts also include the revenue and costs of sales provided under a manufacturing supply agreement between the Company and a subsidiary of ON Semiconductor Corporation, which terminated during the first quarter of fiscal year 2009.

	Three Months Ended	
	January 30, 2010	January 31, 2009
Total revenue	\$ —	\$ 10,332
Cost of sales	—	10,847
Operating expenses	—	15
Gain on sale of discontinued operations	1,316	—
Gain (loss) before income taxes	1,316	(530)
Provision for (benefit from) income taxes	457	(894)
Total income from discontinued operations, net of tax	\$ 859	\$ 364
	<u>January 30, 2010</u>	<u>October 31, 2009</u>
Refundable foreign withholding tax	\$ —	\$ 62,037
Total assets reclassified to non-current assets of discontinued operations	\$ —	\$ 62,037

Note 16 — Income Taxes

The Company has provided for potential liabilities due in the various jurisdictions in which the Company operates. Judgment is required in determining the worldwide income tax expense provision. In the ordinary course of global business, there are many transactions and calculations where the ultimate tax outcome is uncertain. Some of these uncertainties arise as a consequence

Table of Contents

of cost reimbursement arrangements among related entities. Although the Company believes its estimates are reasonable, no assurance can be given that the final tax outcome of these matters will not be different than that which is reflected in the historical income tax provisions and accruals. Such differences could have a material impact on the Company's income tax provision and operating results in the period in which such determination is made.

Fiscal Year 2004 and 2005 IRS Examination

During the fourth quarter of fiscal 2007, the IRS completed its field examination of the Company's fiscal years 2004 and 2005. On January 2, 2008, the IRS issued its report for fiscal 2004 and 2005, which included proposed adjustments related to these two fiscal years. The Company has recorded taxes and penalties related to certain of these proposed adjustments. There are four items with an additional potential total tax liability of \$46 million. The Company has concluded, based on discussions with its tax advisors, that these four items are not likely to result in any additional tax liability. Therefore, the Company has not recorded any additional tax liability for these items and is appealing these proposed adjustments through the normal processes for the resolution of differences between the IRS and taxpayers. The Company's initial meetings with the appellate division of the IRS were held during fiscal year 2009. Two of the unresolved matters are one-time issues and pertain to Section 965 of the Internal Revenue Code related to the beneficial tax treatment of dividends from foreign owned companies under The American Jobs Creation Act. The other matters pertain to the computation of research and development (R&D) tax credits and the profits earned from manufacturing activities carried on outside the United States. These latter two matters could impact taxes payable for fiscal 2004 and 2005 as well as for subsequent years.

Fiscal Year 2006 and 2007 IRS Examination

During the third quarter of fiscal 2009, the IRS completed its field examination of the Company's fiscal years 2006 and 2007. The IRS and the Company have agreed on the treatment of a number of issues that have been included in an Issue Resolutions Agreement related to the 2006 and 2007 tax returns. However, no agreement was reached on the tax treatment of a number of issues, including the same R&D credit and foreign manufacturing issues mentioned above related to fiscal 2004 and 2005, the pricing of intercompany sales (transfer pricing), and the deductibility of certain stock option compensation expenses. During the third quarter of fiscal 2009, the IRS issued its report for fiscal 2006 and fiscal 2007, which included proposed adjustments related to these two fiscal years. The Company has recorded taxes and penalties related to certain of these proposed adjustments. There are four items with an additional potential total tax liability of \$195 million. The Company concluded, based on discussions with its tax advisors, that these four items are not likely to result in any additional tax liability. Therefore, the Company has not recorded any additional tax liability for these items and is appealing these proposed adjustments through the normal processes for the resolution of differences between the IRS and taxpayers. With the exception of the proposed adjustment related to the deductibility of certain stock option expenses, the other three matters could impact taxes payable for fiscal 2006 and 2007 as well as for subsequent years.

Fiscal Year 2008 and 2009 IRS Examination

The IRS has not started their examination of fiscal year 2008 or fiscal year 2009.

Although the Company believes its estimates of income tax payable are reasonable, no assurance can be given that the Company will prevail in the matters raised and that the outcome of one or all of these matters will not be different than that which is reflected in the historical income tax provisions and accruals. The Company believes such differences would not have a material impact on the Company's financial condition but could have a material impact on the Company's income tax provision, operating results and operating cash flows in the period in which such matters are resolved.

Note 17 — New Accounting Pronouncements

Fair Value Measurements and Disclosures

In January 2010, FASB issued ASU No. 2010-06, *Fair Value Measurements and Disclosures (ASC Topic 820) — Improving Disclosures About Fair Value Measurements*. The ASU requires new disclosures about transfers into and out of Levels 1 and 2 and separate disclosures about purchases, sales, issuances, and settlements relating to Level 3 measurements. It also clarifies existing fair value disclosures about the level of disaggregation and about inputs and valuation techniques used to measure fair value. The new disclosures and clarifications of existing disclosures are effective for the Company's first quarter of fiscal year 2010, except for the disclosures about purchases, sales, issuances, and settlements relating to Level 3 measurements, which are effective for the Company's first quarter of fiscal year 2012. Other than requiring additional

[Table of Contents](#)

disclosures, the adoption of this new guidance does not have a material impact on the Company's consolidated results of operations and financial position.

Revenue Arrangements That Include Software Elements

In October 2009, the FASB issued ASU No. 2009-14 — *Software (Topic 985): Certain Revenue Arrangements That Include Software Elements* (formerly EITF Issue No. 09-3). This standard removes tangible products from the scope of software revenue recognition guidance and also provides guidance on determining whether software deliverables in an arrangement that includes a tangible product are within the scope of the software revenue guidance. More specifically, if the software sold with or embedded within the tangible product is essential to the functionality of the tangible product, then this software, as well as undelivered software elements that relate to this software, are excluded from the scope of existing software revenue guidance. ASU No. 2009-14 is effective for fiscal years that begin on or after June 15, 2010, which is our fiscal year 2011. The Company is currently evaluating the impact, if any, that ASU No. 2009-14 may have on the Company financial condition and results of operations.

Multiple-Deliverable Revenue Arrangements

In October 2009, the FASB issued ASU No. 2009-13 — *Revenue Recognition (Topic 605): Multiple-Deliverable Revenue Arrangements* (formerly EITF Issue No. 08-1). This standard modifies the revenue recognition guidance for arrangements that involve the delivery of multiple elements, such as product, software, services or support, to a customer at different times as part of a single revenue generating transaction. This standard provides principles and application guidance to determine whether multiple deliverables exist, how the individual deliverables should be separated and how to allocate the revenue in the arrangement among those separate deliverables. The standard also expands the disclosure requirements for multiple deliverable revenue arrangements. ASU No. 2009-13 is effective for fiscal years that begin on or after June 15, 2010, which is the Company's fiscal year 2011. The Company is currently evaluating the impact, if any, that ASU No. 2009-13 may have on the Company's financial condition and results of operations.

Variable Interest Entities

In December 2009, the FASB issued ASU No. 2009-17 — *Consolidations (Topic 810): Improvements to Financial Reporting by Enterprises Involved with Variable Interest Entities*, which amends ASC 810, *Consolidation*. This standard requires an enterprise to perform an analysis to determine whether the enterprise's variable interest or interests give it a controlling financial interest in a variable interest entity. Additionally, an enterprise is required to assess whether it has an implicit financial responsibility to ensure that a variable interest entity operates as designed when determining whether it has the power to direct the activities of the variable interest entity that most significantly impact the entity's economic performance. ASU No. 2009-17 is effective for fiscal years that begin after November 15, 2009, which is our fiscal year 2011. The Company is currently evaluating the impact, if any, that ASU No. 2009-17 may have on the Company's financial condition and results of operations.

Transfers of Financial Assets

In June 2009, the FASB issued ASU No. 2009-16, *Accounting for Transfers of Financial Asset, (Topic 820)*. This standard changes the way entities account for securitizations and other transfers of financial instruments. ASU No. 2009-16 is effective for fiscal years that begin after November 15, 2009, which is our fiscal year 2011. The Company is currently evaluating the impact, if any, that ASU No. 2009-16 may have on the Company's financial condition and results of operations.

Business Combinations

In December 2007, the FASB issued ASC 805-10 (formerly SFAS 141R, "*Business Combinations*"). ASC 805-10 requires an acquiring entity in a business combination to recognize the assets acquired, liabilities assumed and any noncontrolling interest in the acquiree at their fair value on the acquisition date. It further requires that acquisition-related costs and restructuring costs be recognized separately from the acquisition. In April 2009, the FASB updated ASC 805-10 to amend the provisions for the initial recognition and measurement, subsequent measurement and accounting, and disclosures for assets and liabilities arising from contingencies in business combinations. This update also eliminates the distinction between contractual and non-contractual contingencies. ASC 805-10 is effective for fiscal years beginning after December 15, 2008, which is the Company's fiscal year 2010. On a prospective basis the adoption of ASC 805-10 changed the Company's accounting treatment for business combinations beginning in the first quarter of fiscal year 2010.

[Table of Contents](#)

Noncontrolling Interests

In December 2007, the FASB issued ASC810-10 (formerly SFAS 160, *Noncontrolling Interests in Consolidated Financial Statements*). ASC 810-10 clarifies that a noncontrolling or minority interest in a subsidiary is considered an ownership interest and, accordingly, requires all entities to report such interests in subsidiaries as equity in the consolidated financial statements. The adoption of ASC 810-10 in the first quarter of fiscal year 2010 did not impact the Company's financial condition or results of operations.

Note 18 — Subsequent Event

In accordance with SFAS 165, the Company has evaluated subsequent events through the issuance of these financial statements. On February 16, 2010, the Company's Board of Directors declared a cash dividend of \$0.20 per outstanding share of common stock. The dividend will be paid on March 24, 2010 to all shareholders of record at the close of business on March 5, 2010.

ITEM 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

This information should be read in conjunction with the unaudited condensed consolidated financial statements and related notes included in Item 1 of this Quarterly Report on Form 10-Q and the audited consolidated financial statements and related notes and Management's Discussion and Analysis of Financial Condition and Results of Operations contained in our Annual Report on Form 10-K for the fiscal year ended October 31, 2009.

This Management's Discussion and Analysis of Financial Condition and Results of Operations, including in particular the section entitled "Outlook," contains forward-looking statements regarding future events and our future results that are subject to the safe harbors created under the Securities Act of 1933 (the "Securities Act") and the Securities Exchange Act of 1934 (the "Exchange Act"). These statements are based on current expectations, estimates, forecasts, and projections about the industries in which we operate and the beliefs and assumptions of our management. Words such as "expects," "anticipates," "targets," "goals," "projects," "intends," "plans," "believes," "seeks," "estimates," "continues," "may," variations of such words and similar expressions are intended to identify such forward-looking statements. In addition, any statements that refer to projections regarding our future financial performance, particularly in light of the recent global credit and financial market crisis; our anticipated growth and trends in our businesses, our capital needs and capital expenditures; our market position and competitive changes in the marketplace for our products; our ability to innovate new products and technologies; the timing or the effectiveness of our efforts to refocus our operations and reduce our cost structure and the expected amounts of any cost savings related to those efforts; our ability to access credit or capital markets; our ability to pay dividends or repurchase stock; our ability to service our outstanding debt; our expected tax rate; our third-party suppliers; intellectual property and litigation matters; potential acquisitions or divestitures; key personnel; the effect of new accounting pronouncements and other characterizations of future events or circumstances are forward-looking statements. Readers are cautioned that these forward-looking statements are only predictions and are subject to risks, uncertainties, and assumptions that are difficult to predict, including those identified in Part II, Item 1A. Risk Factors and elsewhere in our Quarterly Report on Form 10-Q. Therefore, actual results may differ materially and adversely from those expressed in any forward-looking statements. We undertake no obligation to revise or update any forward-looking statements except to the extent required by law.

During the first quarter of fiscal 2008, we sold our baseband chipset business and related support operations, or Baseband Chipset Business, to MediaTek Inc. and sold our CPU voltage regulation and PC thermal monitoring business to certain subsidiaries of ON Semiconductor Corporation. The financial results of these businesses are presented as discontinued operations in the consolidated statements of income for all periods presented. The assets and liabilities related to these businesses are reflected as assets and liabilities of discontinued operations in the consolidated balance sheet as of October 31, 2009. Unless otherwise noted, this Management's Discussion and Analysis relates only to financial results from continuing operations.

Results of Operations

(all tabular amounts in thousands except per share amounts and percentages)

[Table of Contents](#)

Overview

	Three Months Ended	
	January 30, 2010	January 31, 2009
Revenue	\$ 602,983	\$ 476,569
Gross margin %	61.1%	56.4%
Income from continuing operations, net of tax	\$ 119,600	\$ 24,585
Income from continuing operations, net of tax as a % of revenue	19.8%	5.2%
Diluted EPS from continuing operations	\$ 0.39	\$ 0.08
Diluted EPS	\$ 0.40	\$ 0.09

The year-to-year revenue changes by end market and product category are more fully outlined below under *Revenue Trends by End Market* and *Revenue Trends by Product Type*.

In the first quarter of fiscal 2010, our revenue increased 26.5% from the first quarter of fiscal 2009 and our diluted earnings per share from continuing operations increased 388%. Cash flow from operations in the first quarter of fiscal 2010 was \$213.8 million, or 35.5% of revenue. In addition, we received \$163.5 million net proceeds related to employee stock option exercises and distributed \$58.9 million to our shareholders in dividend payments. These factors contributed to the net increase in cash, cash equivalents and short-term investments of \$363 million in the first quarter of fiscal 2010.

Revenue Trends by End Market

The following table summarizes revenue by end market. The categorization of revenue by end market is determined using a variety of data points including the technical characteristics of the product, the “sold to” customer information, the “ship to” customer information and the end customer product or application into which our product will be incorporated. As data systems for capturing and tracking this data evolve and improve, the categorization of products by end market can vary over time. When this occurs, we reclassify revenue by end market for prior periods. Such reclassifications typically do not materially change the sizing of, or the underlying trends of results within, each end market.

	Three Months Ended January 30, 2010			Three Months Ended January 31, 2009	
	Revenue	% of Revenue	Y/Y%	Revenue	% of Revenue
Industrial	\$ 259,962	43%	19%	\$ 218,662	46%
Automotive	74,643	12%	81%	41,246	9%
Consumer	117,703	20%	53%	76,702	16%
Communications	135,519	22%	8%	125,708	26%
Computer	15,156	3%	6%	14,251	3%
Total revenue	\$ 602,983	100%	27%	\$ 476,569	100%

Industrial — The year-to-year increase in the first quarter of fiscal 2010 in industrial end market revenue was primarily the result of a broad-based increase in demand in this end market, which was most significant for products sold into the instrumentation, automation, energy and healthcare sectors of this end market.

[Table of Contents](#)

Automotive — The year-to-year increase in the first quarter of fiscal 2010 in automotive end market revenue was primarily the result of increased demand due to various government-initiated incentive programs and inventory replenishment in this end market.

Consumer — The year-to-year increase in the first quarter of fiscal 2010 in consumer end market revenue was primarily the result of a broad-based increase in demand for products used in digital cameras, home entertainment and other consumer applications in this end market.

Communications — The year-to-year increase in the first quarter of fiscal 2010 in communications end market revenue was the result of an increase in sales in the infrastructure and handset sectors, offset by a sales reduction in the base station end market sector.

Revenue Trends by Product Type

The following table summarizes revenue by product categories. The categorization of our products into broad categories is based on the characteristics of the individual products, the specification of the products and in some cases the specific uses that certain products have within applications. The categorization of products into categories is therefore subject to judgment in some cases and can vary over time. In instances where products move between product categories, we reclassify the amounts in the product categories for all prior periods. Such reclassifications typically do not materially change the sizing of, or the underlying trends of results within, each product category.

	Three Months Ended January 30, 2010			Three Months Ended January 31, 2009	
	Revenue	% of Revenue*	Y/Y%	Revenue	% of Revenue
Converters	\$ 317,403	53%	25%	\$ 252,925	53%
Amplifiers / Radio frequency	148,066	25%	13%	130,716	27%
Other analog	46,279	8%	95%	23,754	5%
Subtotal analog signal processing	511,748	85%	26%	407,395	85%
Power management & reference	38,708	6%	50%	25,738	5%
Total analog products	\$ 550,456	91%	27%	\$ 433,133	91%
Digital signal processing	\$ 52,527	9%	21%	\$ 43,436	9%
Total revenue	\$ 602,983	100%	27%	\$ 476,569	100%

* The sum of the individual percentages may not equal the total due to rounding.

The year-to-year increase in revenue in the three-month period ended January 30, 2010 was the result of a broad-based increase in sales across all of our product categories.

Revenue Trends by Geographic Region

Revenue by geographic region, based upon customer location, for the three-month periods ended January 30, 2010 and January 31, 2009 was as follows:

[Table of Contents](#)

Region	Three Months Ended	
	January 30, 2010	January 31, 2009
United States	\$ 116,963	\$ 107,298
Rest of North and South America	29,879	19,332
Europe	142,066	127,745
Japan	110,350	72,733
China	106,522	89,712
Rest of Asia	97,203	59,749
Total revenue	\$ 602,983	\$ 476,569

In the three month period ended January 30, 2010 the predominant countries comprising “Rest of North and South America” are Canada and Mexico; the predominant countries comprising “Europe” are Germany and Sweden; and the predominant countries comprising “Rest of Asia” are Taiwan and Korea.

In the three month period ended January 31, 2009 the predominant countries comprising “Rest of North and South America” are Canada and Mexico; the predominant countries comprising “Europe” are Germany, Sweden, France and Italy; and the predominant countries comprising “Rest of Asia” are Taiwan and Singapore.

Sales increased in all geographic regions in the first quarter of fiscal 2010, as compared to the first quarter of fiscal 2009, with sales in Japan and the Rest of Asia experiencing the largest increases.

Gross Margin

	Three Months Ended	
	January 30, 2010	January 31, 2009
Gross margin	\$ 368,476	\$ 269,002
Gross margin %	61.1%	56.4%

Gross margin percentage was higher by 470 basis points in the first quarter of fiscal 2010 as compared to the first quarter of fiscal 2009 primarily as a result of an increase in sales of \$126.4 million and increased operating levels in our manufacturing facilities.

Stock-Based Compensation Expense

As of January 30, 2010, the total compensation cost related to unvested equity awards not yet recognized in our statement of income was approximately \$136 million (before tax consideration), which we will recognize over a weighted average period of 1.7 years. See Note 3 in the Notes to our Condensed Consolidated Financial Statements contained in Item 1 of this Quarterly Report on Form 10-Q for further information.

[Table of Contents](#)

Research and Development

	Three Months Ended	
	January 30, 2010	January 31, 2009
R&D expenses	\$ 114,398	\$ 119,828
R&D expenses as a % of revenue	19.0%	25.1%

Research and development, or R&D, expenses decreased \$5.4 million, or 4.5%, in the first quarter of fiscal 2010 as compared to the first quarter of fiscal 2009. The decrease was primarily the result of the actions we took to constrain or permanently reduce operating expenses, offset by an increase in variable compensation expense, which is a variable expense linked to our overall profitability.

R&D expenses as a percentage of revenue will fluctuate from year-to-year depending on the amount of revenue and the success of new product development efforts, which we view as critical to our future growth. At any point in time we have hundreds of R&D projects underway, and we believe that none of these projects is material on an individual basis. We expect to continue the development of innovative technologies and processes for new products, and we believe that a continued commitment to R&D is essential in order to maintain product leadership with our existing products and to provide innovative new product offerings, and therefore, we expect to continue to make significant R&D investments in the future.

Selling, Marketing, General and Administrative

	Three Months Ended	
	January 30, 2010	January 31, 2009
SMG&A expenses	\$ 88,481	\$ 87,846
SMG&A expenses as a % of revenue	14.7%	18.4%

Selling, marketing, general and administrative, or SMG&A, expenses increased \$0.6 million, or 0.7%, in the first quarter of fiscal 2010 as compared to the first quarter of fiscal 2009. The increase was primarily the result of higher sales commission expenses which are variable expenses linked to our sales and an increase in variable compensation expense, which is a variable expense linked to our overall profitability. These increases were offset by the actions we took to control discretionary spending and permanently reduce operating expenses.

Special Charges

The following is a summary of the restructuring actions we have taken over the last several years.

Closure of Wafer Fabrication Facility in Sunnyvale

We ceased production at our California wafer fabrication facility in November 2006. We have been paying the related lease obligation costs on a monthly basis over the remaining lease term, which expires in March 2010. We recorded a one-time settlement charge of \$0.4 million in the first quarter of fiscal 2010 related to the termination of the lease. We do not expect to incur any additional charges related to this action.

Consolidation of a Wafer Fabrication Facility in Limerick

In fiscal 2007, we recorded a special charge of \$13.7 million as a result of our decision to only use eight-inch technology at our wafer fabrication facility in Limerick. Certain manufacturing processes and products produced on the Limerick facility's six-inch production line have transitioned to our existing eight-inch production line in Limerick while others have transitioned to external foundries. The charge was for severance and fringe benefit costs recorded in accordance with our ongoing benefit plan for 150 manufacturing employees associated with this action. As of January 30, 2010, we still employed 1 of the 150 employees included in this action. This employee must continue to be employed until his employment is involuntarily terminated in order to receive the severance benefit. During fiscal 2008, we recorded an additional charge of

[Table of Contents](#)

\$1.5 million related to this action, of which \$1.2 million was an adjustment to the original estimate of the severance costs and \$0.3 million was for clean-up and closure costs that we expensed as incurred. During fiscal 2009, we recorded additional charges of \$1.2 million for clean-up and closure costs that we expensed as incurred. The production in the six-inch wafer fabrication facility ceased during the fourth quarter of fiscal 2009. We do not expect to incur any further charges related to this action. We estimate that the closure of this facility will result in annual cost savings of approximately \$25 million per year, which we began realizing in the first quarter of fiscal 2010. We expect these annual savings will be in cost of sales, of which approximately \$1 million relates to non-cash depreciation savings.

Reduction of Operating Costs

During the fourth quarter of fiscal 2008, in order to further reduce our operating cost structure, we recorded a special charge of \$1.6 million for severance and fringe benefit costs recorded in accordance with our ongoing benefit plan or the statutory requirements at foreign locations for 19 engineering, selling, marketing, general and administrative employees. We terminated the employment of all employees associated with this charge and are paying amounts owed to employees for severance as income continuance.

During fiscal 2009, we recorded an additional charge of \$30.3 million related to this cost reduction action. Approximately \$2.1 million of this charge was for lease obligation costs for facilities that we ceased using during the first quarter of fiscal 2009; approximately \$0.9 million was for the write-off of property, plant and equipment; and approximately \$0.8 million was for contract termination costs and for clean-up and closure costs that we expensed as incurred. The remaining \$26.5 million related to the severance and fringe benefit costs recorded in accordance with our ongoing benefit plan or the statutory requirements at foreign locations, for 245 manufacturing employees and 302 engineering and SMG&A employees. As of January 30, 2010, we still employed 3 of the 547 employees included in this cost reduction action. These employees must continue to be employed by us until their employment is involuntarily terminated in order to receive the severance benefit. This cost reduction action, which was substantially completed during the second quarter of fiscal 2009 results in annual savings of approximately \$36.4 million. These annual savings are being realized as follows: approximately \$31.6 million in SMG&A expenses and approximately \$4.8 million in cost of sales.

During the first quarter of fiscal 2010, we recorded an additional charge of \$11.4 million related to the further reduction of our operating cost structure. Approximately \$10.9 million of this charge was for severance and fringe benefit costs recorded in accordance with our ongoing benefit plan or the statutory requirements at foreign locations for 149 engineering and SMG&A employees. As of January 30, 2010, we still employed 86 of the 149 employees included in this cost reduction action. These employees must continue to be employed by us until their employment is involuntarily terminated in order to receive the severance benefit. Approximately \$0.5 million of the charge relates to our decision to abandon efforts to develop a particular expertise in power management, resulting in the impairment of related intellectual property. When fully implemented we estimate that these cost reduction actions will result in quarterly savings of approximately \$4 million, beginning in the first quarter of fiscal 2011.

Closure of a Wafer Fabrication Facility in Cambridge

During the first quarter of fiscal 2009, we recorded a special charge of \$22.1 million as a result of our decision to consolidate our Cambridge, Massachusetts wafer fabrication facility into our existing Wilmington, Massachusetts facility. In connection with the anticipated closure of this facility, we evaluated the recoverability of the facility's manufacturing assets and concluded that there was an impairment of approximately \$12.9 million based on the revised period of intended use. The remaining \$9.2 million was for severance and fringe benefit costs recorded in accordance with our ongoing benefit plan for 175 manufacturing employees and 9 SMG&A employees associated with this action.

We finished production in the Cambridge wafer fabrication facility and began clean-up activities during the fourth quarter of fiscal 2009. During the fourth quarter of fiscal 2009, we reversed approximately \$1.8 million of our severance accrual. The accrual reversal was required because 51 employees either voluntarily left the Company or found alternative employment within the Company. In addition, we recorded a special charge of approximately \$1.7 million for the impairment of manufacturing assets that were originally going to be moved to our other wafer fabrication facilities but are no longer needed at those facilities and therefore have no future use. We also recorded a special charge of \$0.1 million for clean-up costs as we began our clean-up of the Cambridge wafer fabrication facility at the end of the fourth quarter of fiscal 2009. As of January 30, 2010, we still employed 9 of the employees included in this action. These employees must continue to be employed by us until their employment is involuntarily terminated in order to receive the severance benefit. We estimate that this action will result in annual cost

[Table of Contents](#)

savings of approximately \$41 million per year, starting in the third quarter of fiscal 2010. We expect these annual savings to be realized as follows: approximately \$40.2 million in cost of sales, of which approximately \$4.0 million relates to non-cash depreciation savings, and approximately \$0.8 million relates to SMG&A expense.

During the first quarter of fiscal 2010, we recorded an additional charge of \$4.7 million related to this cost reduction action. Approximately \$3.4 million of the charge related to lease obligation costs for the Cambridge wafer fabrication facility which we ceased using in the first quarter of fiscal 2010 and the remaining \$1.3 million of the charge related to cleanup and closure costs. We estimate that these cost reductions will result in quarterly savings of \$0.6 million beginning in the current fiscal quarter.

Operating Income from Continuing Operations

	Three Months Ended	
	January 30, 2010	January 31, 2009
Operating income from continuing operations	\$ 149,114	\$ 19,591
Operating income from continuing operations as a % of revenue	24.7%	4.1%

The \$129.5 million increase in operating income from continuing operations in the first quarter of fiscal 2010 as compared to the first quarter of fiscal 2009 was primarily the result of an increase in revenue of \$126.4 million, a 470 basis point increase in gross margin percentage and lower special charges taken in the first quarter of fiscal 2010 as compared to the first quarter of fiscal 2009.

Nonoperating (Income) Expense

	Three Months Ended	
	January 30, 2010	January 31, 2009
Interest expense	\$ 2,538	\$ —
Interest income	(2,180)	(7,796)
Other expense, (income) net	489	(571)
Total nonoperating expenses/(income)	\$ 847	\$ (8,367)

Nonoperating income was lower by \$9.2 million in the first quarter of fiscal 2010 as compared to the first quarter of fiscal 2009 primarily due to lower interest income earned on investments as a result of lower interest rates in the first quarter of fiscal 2010 as compared to the first quarter of fiscal 2009. In addition, we incurred interest expense during the first quarter of fiscal 2010 as a result of the issuance of \$375 million aggregate principal 5.0% senior unsecured notes on June 30, 2009.

Provision for Income Taxes

	Three Months Ended	
	January 30, 2010	January 31, 2009
Provision for income taxes	\$ 28,667	\$ 3,373
Effective income tax rate	19.3%	12.1%

Our effective tax rate reflects the applicable tax rate in effect in the various tax jurisdictions around the world where our income is earned. Our effective tax rate for the first quarter of fiscal 2010 was higher compared to our effective tax rate for the first quarter of fiscal 2009 as a result of a change in the mix of our income to jurisdictions where income is taxed at a higher rate and the impact of lower special charges in the first quarter of fiscal 2010 as compared to the first quarter of fiscal 2009.

[Table of Contents](#)

Income from Continuing Operations, net of tax

	Three Months Ended	
	January 30, 2010	January 31, 2009
Income from continuing operations, net of tax	\$ 119,600	\$ 24,585
Income from continuing operations, net of tax as a % of revenue	19.8%	5.2%
Diluted EPS from continuing operations	\$ 0.39	\$ 0.08

Income from continuing operations, net of tax, in the first quarter of fiscal 2010 was higher than in the first quarter of fiscal 2009 by approximately \$95.0 million primarily as a result of the \$129.5 million increase in operating income that was partially offset by a higher provision for income taxes in the first quarter of fiscal 2010.

Discontinued Operations

	Three Months Ended	
	January 30, 2010	January 31, 2009
Income from discontinued operations, net of tax	\$ —	\$ 364
Gain on sale of discontinued operations, net of tax	859	—
Total income from discontinued operations, net of tax	\$ 859	\$ 364
Diluted EPS from discontinued operations	\$ 0.00	\$ 0.00

We sold our Baseband Chipset Business to MediaTek Inc. and our CPU voltage regulation and PC thermal monitoring business to certain subsidiaries of ON Semiconductor Corporation during the first quarter of fiscal 2008. Accordingly, we have presented the results of the operations of these businesses as discontinued operations within our consolidated financial statements.

Outlook

The following statements are based on current expectations. These statements are forward-looking, and actual results may differ materially. Unless specifically mentioned, these statements do not give effect to the potential impact of any mergers, acquisitions, divestitures, or business combinations that may be announced or closed after the date of filing this report. These statements supersede all prior statements regarding our business outlook made by us.

We are planning for revenue in the second quarter of fiscal 2010 to be approximately \$635 to \$650 million. Our plan is for gross margins for the second quarter to increase to approximately 62% to 63% and operating margins to increase to approximately 29% to 31%. This would result in diluted earnings per share from continuing operations to be in the range of \$0.48 to \$0.51 in the second quarter.

Liquidity and Capital Resources

	Three Months Ended	
	January 30, 2010	January 31, 2009
Net cash provided by operations	\$ 213,773	\$ 59,910
Net cash provided by operations as a % of revenue	35.5%	12.6%

At January 30, 2010, cash, cash equivalents and short-term investments totaled \$2,179 million. The primary sources of funds for the first three months of fiscal 2010 were net cash generated from operating activities of \$213.8 million and \$163.5 million net proceeds from employee stock option exercises. The principal uses of funds for the first three months of fiscal 2010 were dividend payments of \$58.9 million and capital expenditures of \$17.2 million. These factors contributed to the net increase in cash, cash equivalents and short-term investments of \$363 million in the first quarter of fiscal 2010.

[Table of Contents](#)

	<u>January 30, 2010</u>	<u>October 31, 2009</u>
Accounts receivable	\$ 313,288	\$ 301,036
Days sales outstanding	47	48
Inventory	\$ 243,275	\$ 253,161
Days cost of sales in inventory	95	92

Accounts receivable at January 30, 2010 increased \$12.3 million, or 4%, from the end of the fourth quarter of fiscal 2009. The increase in receivables was the result of higher revenue in the first quarter of fiscal 2010 as compared to the fourth quarter of fiscal 2009.

Inventory at January 30, 2010 decreased by \$9.9 million, or 4%, from the end of the fourth quarter of fiscal 2009. The decrease in inventory is primarily a result of higher sales during the first three months of fiscal 2010.

Net additions to property, plant and equipment were \$17.2 million in the first three months of fiscal 2010 and were funded with a combination of cash on hand and cash generated from operations. We expect capital expenditures to be approximately \$75 to \$85 million in fiscal 2010.

On February 16, 2010, our Board of Directors declared a cash dividend of \$0.20 per outstanding share of our common stock. The dividend is payable on March 24, 2010 to shareholders of record on March 5, 2010 and is expected to be approximately \$60 million in the aggregate. We expect quarterly dividends to continue at \$0.20 per share, although they remain subject to declaration or change by our Board of Directors. The payment of future dividends, if any, will be based on several factors including our financial performance, outlook and liquidity.

Our common stock repurchase program has been in place since August 2004. In the aggregate, the Board of Directors has authorized us to repurchase \$4 billion of our common stock under the program. Under the program, we may repurchase outstanding shares of our common stock from time to time in the open market and through privately negotiated transactions. Unless terminated earlier by resolution of our Board of Directors, the repurchase program will expire when we have repurchased all shares authorized under the program. As of January 30, 2010, we had repurchased a total of approximately 114.7 million shares of our common stock for approximately \$3,908.4 million under this program and an additional \$91.6 million remains under the current authorized program. The repurchased shares are held as authorized but unissued shares of common stock. We also from time to time repurchase shares in settlement of employee tax withholding obligations due upon the vesting of restricted stock or restricted stock units or the exercise of stock options or in certain limited circumstances to satisfy the exercise price of options granted to the Company's employees under the Company's equity compensation plans. Any future common stock repurchases will be based on several factors including our financial performance, outlook, liquidity and the amount of cash we have available in the United States.

On June 30, 2009, we issued \$375 million aggregate principal amount of 5.0% senior unsecured notes due July 1, 2014 (the Notes) with annual interest payments of 5.0% paid in two installments on January 1 and July 1 of each year, commencing January 1, 2010. The net proceeds of the offering were \$370.4 million, after issuing at a discount and deducting expenses, underwriting discounts and commissions, which will be amortized over the term of the Notes. We swapped the fixed interest portion of these Notes for a variable interest rate based on the three-month LIBOR plus 2.05% (2.3% as of January 30, 2010). The variable interest payments based on the variable annual rate are payable quarterly. The LIBOR based rate is set quarterly three months prior to the date of the interest payment. The indenture governing the Notes contains covenants that may limit our ability to: incur, create, assume or guarantee any debt for borrowed money secured by a lien upon a principal property; enter into sale and lease-back transactions with respect to a principal property; and consolidate with or merge into, or transfer or lease all or substantially all of our assets to, any other party. In addition, we have a five-year \$165 million unsecured revolving credit facility that expires in May 2013. To date, we have not borrowed under this credit facility but we may borrow in the future and use the proceeds for support of commercial paper issuance, stock repurchases, dividend payments, acquisitions, capital expenditures, working capital and other lawful corporate purposes.

At January 30, 2010, our principal source of liquidity was \$2,179 million of cash and cash equivalents and short-term investments. As of January 30, 2010, approximately \$627.7 million of our cash and cash equivalents and short-term investments were held in the United States. The balance of our cash and cash equivalents and short-term investments was held outside the United States in various foreign subsidiaries. As we intend to reinvest certain of our foreign earnings indefinitely,

[Table of Contents](#)

this cash held outside the United States is not available to meet certain of our cash requirements in the United States, including for cash dividends and common stock repurchases.

The volatility in the credit markets has generally diminished liquidity and capital availability in worldwide markets. We are unable to predict the likely duration and severity of the current disruptions in the credit and financial markets and adverse global economic conditions. However, we believe that our existing sources of liquidity and cash expected to be generated from future operations, together with existing and anticipated available long-term financing, will be sufficient to fund operations, capital expenditures, research and development efforts, dividend payments (if any) and purchases of stock (if any) under our stock repurchase program in the immediate future and for at least the next twelve months.

Contractual Obligations

There have not been any material changes during the three months of fiscal 2010 to the amounts presented in the table summarizing our contractual obligations included in our Annual Report on Form 10-K for the year ended October 31, 2009.

New Accounting Pronouncements

Fair Value Measurements and Disclosures

In January 2010, FASB issued ASU No. 2010-06, *Fair Value Measurements and Disclosures (ASC Topic 820) — Improving Disclosures About Fair Value Measurements*. The ASU requires new disclosures about transfers into and out of Levels 1 and 2 and separate disclosures about purchases, sales, issuances, and settlements relating to Level 3 measurements. It also clarifies existing fair value disclosures about the level of disaggregation and about inputs and valuation techniques used to measure fair value. The new disclosures and clarifications of existing disclosures are effective for our first quarter of fiscal year 2010, except for the disclosures about purchases, sales, issuances, and settlements relating to Level 3 measurements, which are effective for our first quarter of fiscal year 2012. Other than requiring additional disclosures, the adoption of this new guidance does not have a material impact on our consolidated results of operations and financial position.

Revenue Arrangements That Include Software Elements

In October 2009, the FASB issued ASU No. 2009-14 — *Software (Topic 985): Certain Revenue Arrangements That Include Software Elements* (formerly EITF Issue No. 09-3). This standard removes tangible products from the scope of software revenue recognition guidance and also provides guidance on determining whether software deliverables in an arrangement that includes a tangible product are within the scope of the software revenue guidance. More specifically, if the software sold with or embedded within the tangible product is essential to the functionality of the tangible product, then this software, as well as undelivered software elements that relate to this software, are excluded from the scope of existing software revenue guidance. ASU No. 2009-14 is effective for fiscal years that begin on or after June 15, 2010, which is our fiscal year 2011. We are currently evaluating the impact, if any, that ASU No. 2009-14 may have on our financial condition and results of operations.

Multiple-Deliverable Revenue Arrangements

In October 2009, the FASB issued ASU No. 2009-13 — *Revenue Recognition (Topic 605): Multiple-Deliverable Revenue Arrangements* (formerly EITF Issue No. 08-1). This standard modifies the revenue recognition guidance for arrangements that involve the delivery of multiple elements, such as product, software, services or support, to a customer at different times as part of a single revenue generating transaction. This standard provides principles and application guidance to determine whether multiple deliverables exist, how the individual deliverables should be separated and how to allocate the revenue in the arrangement among those separate deliverables. The standard also expands the disclosure requirements for multiple deliverable revenue arrangements. ASU No. 2009-13 is effective for fiscal years that begin on or after June 15, 2010, which is our fiscal year 2011. We are currently evaluating the impact, if any, that ASU No. 2009-13 may have on our financial condition and results of operations.

Variable Interest Entities

In December 2009, the FASB issued ASU No. 2009-17 — *Consolidations (Topic 810): Improvements to Financial Reporting by Enterprises Involved with Variable Interest Entities*, which amends ASC 810, *Consolidation*. This standard requires an enterprise to perform an analysis to determine whether the enterprise's variable interest or interests give it a controlling financial interest in a variable interest entity. Additionally, an enterprise is required to assess whether it has an implicit financial responsibility to ensure that a variable interest entity operates as designed when determining whether it has the power to direct the activities of the variable interest entity that most significantly impact the entity's economic performance. ASU No. 2009-17 is effective for fiscal years that begin after November 15, 2009, which is our fiscal year 2011. We are currently evaluating the impact, if any, that ASU No. 2009-17 may have on our financial condition and results of operations.

[Table of Contents](#)

Transfers of Financial Assets

In June 2009, the FASB issued ASU No. 2009-16, *Accounting for Transfers of Financial Assets*, (Topic 820). This standard changes the way entities account for securitizations and other transfers of financial instruments. ASU No. 2009-16 is effective for fiscal years that begin after November 15, 2009, which is our fiscal year 2011. We are currently evaluating the impact, if any, that ASU No. 2009-16 may have on our financial condition and results of operations.

Business Combinations

In December 2007, the FASB issued ASC 805-10 (formerly SFAS 141R, “Business Combinations”). ASC 805-10 requires an acquiring entity in a business combination to recognize the assets acquired, liabilities assumed and any noncontrolling interest in the acquiree at their fair value on the acquisition date. It further requires that acquisition-related costs and restructuring costs be recognized separately from the acquisition. In April 2009, the FASB updated ASC 805-10 to amend the provisions for the initial recognition and measurement, subsequent measurement and accounting, and disclosures for assets and liabilities arising from contingencies in business combinations. This update also eliminates the distinction between contractual and non-contractual contingencies. ASC 805-10 is effective for fiscal years beginning after December 15, 2008, which is our fiscal year 2010. On a prospective basis the adoption of ASC 805-10 changed our accounting treatment for business combinations beginning in the first quarter of fiscal year 2010.

Noncontrolling Interests

In December 2007, the FASB issued ASC 810-10 (formerly SFAS 160, *Noncontrolling Interests in Consolidated Financial Statements*). ASC 810-10 clarifies that a noncontrolling or minority interest in a subsidiary is considered an ownership interest and, accordingly, requires all entities to report such interests in subsidiaries as equity in the consolidated financial statements. The adoption of ASC 810-10 in the first quarter of fiscal year 2010 did not impact the Company’s financial condition or results of operations.

Critical Accounting Policies and Estimates

There were no material changes in the first quarter of fiscal 2010 to the information provided under the heading “Critical Accounting Policies and Estimates” included in our Annual Report on Form 10-K for the fiscal year ended October 31, 2009.

ITEM 3. Quantitative and Qualitative Disclosures About Market Risk

Interest Rate Exposure

In June 2009, we entered into an interest rate swap agreement to hedge the benchmark interest rate of our \$375 million 5.0% Notes due July 1, 2014. The effect of the swap was to convert our 5.0% fixed interest rate to a variable interest rate based on the three-month LIBOR plus 2.05% (2.30% as of January 31, 2010). If LIBOR changes by 100 basis points, our annual interest expense would change by \$3.8 million.

There have been no other material changes in the first quarter of fiscal 2010 in the information provided under Item 7A. "Quantitative and Qualitative Disclosures about Market Risk" set forth in our Annual Report on Form 10-K for the year ended October 31, 2009.

PART II - - OTHER INFORMATION

ITEM 4. Controls and Procedures

(a) *Evaluation of Disclosure Controls and Procedures.* Our management, with the participation of our Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of Analog's disclosure controls and procedures as of January 31, 2010. The term "disclosure controls and procedures," as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act"), means controls and other procedures of a company that are designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is accumulated and communicated to the company's management, including its principal executive and principal financial officers, as appropriate to allow timely decisions regarding required disclosure. Management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving their objectives and management necessarily applies its judgment in evaluating the cost-benefit relationship of possible controls and procedures. Based on the evaluation of our disclosure controls and procedures as of January 31, 2010, our Chief Executive Officer and Chief Financial Officer concluded that, as of such date, our disclosure controls and procedures were effective at the reasonable assurance level.

(b) *Changes in Internal Control over Financial Reporting.* No change in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) occurred during the quarter ended January 31, 2010 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

ITEM 1A. RISK FACTORS

Set forth below and elsewhere in this report and in other documents we file with the SEC are descriptions of the risks and uncertainties that could cause our actual results to differ materially from the results contemplated by the forward-looking statements contained in this report. The description below includes any material changes to and supersedes the description of the risk factors affecting our business previously discussed in Part I, Item 1A "Risk Factors" of our Annual Report on Form 10-K for the fiscal year ended October 31, 2009.

The fragile global economic recovery may falter, thus materially and adversely affecting our business and results of operations.

Global credit and financial markets appear to be recovering from extreme disruptions experienced over the past year; however widespread uncertainty about economic stability remains. Our business was significantly affected by the global economic crisis. While there are signs that conditions may be improving, there is no certainty that the current tentative recovery in credit and financial markets will continue. These economic uncertainties affect businesses such as ours in a number of ways, making it difficult to accurately forecast and plan our future business activities. Layoffs, continued weakness in commercial and residential real estate markets and the continued tightening of credit by financial institutions may lead consumers and businesses to continue to postpone spending, which may cause our customers to cancel, decrease or delay their existing and future orders with us. In addition, the inability of customers to obtain credit could impair their ability to make timely payments to us. Customer insolvencies in key industries, such as the automotive industry, could also negatively impact our revenues and our ability to collect receivables. In addition, financial difficulties experienced by our suppliers or distributors could result in product delays, increased accounts receivable defaults and inventory challenges. The financial turmoil could

[Table of Contents](#)

cause financial institutions to consolidate or go out of business, which increases the risk that the actual amounts realized in the future on our financial instruments could differ significantly from the fair value assigned to them. We are unable to predict the likely duration and severity of the current economic recession, and if current uncertain economic conditions deteriorate, we may record additional charges relating to restructuring costs or the impairment of assets and our business and results of operations could be materially and adversely affected.

Our future revenue, gross margins, operating results and net income are difficult to predict and may materially fluctuate.

Our future revenue, gross margins, operating results and net income are difficult to predict and may be materially affected by a number of factors, including:

- the effects of adverse economic conditions in the United States and international markets;
- changes in customer demand for our products and for end products that incorporate our products;
- the effectiveness of our efforts to refocus our operations, including our ability to reduce our cost structure in both the short term and over a longer duration;
- the timing of new product announcements or introductions by us, our customers or our competitors;
- competitive pricing pressures;
- fluctuations in manufacturing yields, adequate availability of wafers and other raw materials, and manufacturing, assembly and test capacity;
- any significant decline in our backlog;
- the timing, delay or cancellation of significant customer orders and our ability to manage inventory;
- our ability to hire, retain and motivate adequate numbers of engineers and other qualified employees to meet the demands of our customers;
- changes in geographic, product or customer mix;
- our ability to utilize our manufacturing facilities at efficient levels;
- potential significant litigation-related costs;
- the difficulties inherent in forecasting future operating expense levels, including with respect to costs associated with labor, utilities, transportation and raw materials;
- the costs related to compliance with increasing worldwide environmental regulations;
- changes in our effective tax rates in the United States, Ireland or worldwide; and
- the effects of public health emergencies, natural disasters, security risks, terrorist activities, international conflicts and other events beyond our control.

In addition, the semiconductor market has historically been cyclical and subject to significant economic upturns and downturns. Our business is subject to rapid technological changes and there can be no assurance, depending on the mix of future business, that products stocked in our inventory will not be rendered obsolete before we ship them. As a result of these and other factors, there can be no assurance that we will not experience material fluctuations in future revenue, gross margins, operating results and net income on a quarterly or annual basis. In addition, if our revenue, gross margins, operating results and net income do not meet the expectations of securities analysts or investors, the market price of our common stock may decline.

[Table of Contents](#)

Changes in our effective tax rate may impact our results of operations.

A number of factors may increase our future effective tax rate, including: the jurisdictions in which profits are earned and taxed; the resolution of issues arising from tax audits with various tax authorities; changes in the valuation of our deferred tax assets and liabilities; adjustments to income taxes upon finalization of various tax returns; increases in expenses not deductible for tax purposes, including write-offs of acquired in-process research and development and impairments of goodwill in connection with acquisitions; changes in available tax credits; and changes in tax laws or the interpretation of such tax laws. Any significant increase in our future effective tax rates could adversely impact our net income for future periods.

Long-term contracts are not typical for us and reductions, cancellations or delays in orders for our products could adversely affect our operating results.

We typically do not have long-term sales contracts with our customers. In certain markets where end-user demand may be particularly volatile and difficult to predict, some customers place orders that require us to manufacture product and have it available for shipment, even though the customer is unwilling to make a binding commitment to purchase all, or even any, of the product. In other instances, we manufacture product based on forecasts of customer demands. As a result, we may incur inventory and manufacturing costs in advance of anticipated sales and are subject to the risk of cancellations of orders, leading to a sharp reduction of sales and backlog. Further, orders or forecasts may be for products that meet the customer's unique requirements so that those cancelled or unrealized orders would, in addition, result in an inventory of unsaleable products, causing potential inventory write-offs. As a result of lengthy manufacturing cycles for certain of the products that are subject to these uncertainties, the amount of unsaleable product could be substantial. Incorrect forecasts, or reductions, cancellations or delays in orders for our products could adversely affect our operating results.

Our future success depends upon our ability to continue to innovate, improve our products, develop and market new products, and identify and enter new markets.

Our success significantly depends on our continued ability to improve our products and develop and market innovative new products. Product development, innovation and enhancement is often a complex, time-consuming and costly process involving significant investment in research and development, with no assurance of return on investment. There can be no assurance that we will be able to develop and introduce new and improved products in a timely or efficient manner or that new and improved products, if developed, will achieve market acceptance. Our products generally must conform to various evolving and sometimes competing industry standards, which may adversely affect our ability to compete in certain markets or require us to incur significant costs. In addition, our customers generally impose very high quality and reliability standards on our products, which often change and may be difficult or costly to satisfy. Any inability to satisfy customer quality standards or comply with industry standards and technical requirements may adversely affect demand for our products and our results of operations. In addition, our growth is dependent on our continued ability to identify and penetrate new markets where we have limited experience and competition is intense. Also, some of our customers in these markets are less established, which could subject us to increased credit risk. There can be no assurance that the markets we serve will grow in the future, that our existing and new products will meet the requirements of these markets, that our products will achieve customer acceptance in these markets, that competitors will not force price reductions or take market share from us, or that we can achieve or maintain adequate gross margins or profits in these markets. Furthermore, a decline in demand in one or several of our end-user markets could have a material adverse effect on the demand for our products and our results of operations.

We may not be able to compete successfully in markets within the semiconductor industry in the future.

We face intense technological and pricing competition in the semiconductor industry, and we expect this competition to increase in the future. Many other companies offer products that compete with our products. Some have greater financial, manufacturing, technical, sales and marketing resources than we have. Some of our competitors may have more advantageous supply or development relationships with our current and potential customers or suppliers. Our competitors also include emerging companies selling specialized products in markets we serve. Competition is generally based on design and quality of products, product performance, features and functionality, and product pricing, availability and capacity, with the relative importance of these factors varying among products, markets and customers. Existing or new competitors may develop products or technologies that more effectively address the demands of our customers and markets with enhanced performance, features and functionality, lower power requirements, greater levels of integration or lower cost. Increased competition in certain markets has resulted in and may continue to result in declining average selling prices, reduced gross margins and loss of market share in those markets. There can be no assurance that we will be able to compete successfully in the future against existing or new competitors, or that our operating results will not be adversely affected by increased competition.

Table of Contents

We rely on third-party subcontractors and manufacturers for some industry-standard wafers and assembly and test services, and generally cannot control their availability or conditions of supply.

We rely, and plan to continue to rely, on assembly and test subcontractors and on third-party wafer fabricators to supply most of our wafers that can be manufactured using industry-standard submicron processes. This reliance involves several risks, including reduced control over availability, capacity utilization, delivery schedules, manufacturing yields, and costs. Additionally, we utilize a limited number of third-party wafer fabricators, primarily Taiwan Semiconductor Manufacturing Company, or TSMC. These suppliers manufacture components in accordance with our proprietary designs and specifications. In addition, these suppliers often provide manufacturing services to our competitors and therefore periods of increased industry demand may result in capacity constraints. If these suppliers are unable or unwilling to manufacture and deliver sufficient quantities of components to us on the time schedule and of the quality that we require, we may be forced to seek to engage additional or replacement suppliers, which could result in additional expenses and delays in product development or shipment of product to our customers. Approximately 52% of our first fiscal quarter 2010 revenue and approximately 49% of our fiscal 2009 revenue was from products fabricated at third-party wafer-fabrication facilities, primarily TSMC.

The markets for semiconductor products are cyclical, and increased production may lead to overcapacity and lower prices, and conversely, we may not be able to satisfy unexpected demand for our products.

The cyclical nature of the semiconductor industry has resulted in periods when demand for our products has increased or decreased rapidly. If we expand our operations and workforce too rapidly or procure excessive resources in anticipation of increased demand for our products, and that demand does not materialize at the pace at which we expect or declines, or if we overbuild inventory in a period of decreased demand, our operating results may be adversely affected as a result of increased operating expenses, reduced margins, underutilization of capacity or asset impairment charges. These capacity expansions by us and other semiconductor manufacturers could also lead to overcapacity in our target markets which could lead to price erosion that would adversely impact our operating results. Conversely, during periods of rapid increases in demand, our available capacity may not be sufficient to satisfy the demand. In addition, we may not be able to expand our workforce and operations in a sufficiently timely manner, procure adequate resources, or locate suitable third-party suppliers, to respond effectively to changes in demand for our existing products or to the demand for new products requested by our customers, and our current or future business could be materially and adversely affected.

Our semiconductor products are complex and we may be subject to product warranty and indemnity claims, which could result in significant costs and damage to our reputation and adversely affect the market acceptance of our products.

Semiconductor products are highly complex and may contain defects when they are first introduced or as new versions are developed. We generally warrant our products to our customers for one year from the date title passes from us. We invest significant resources in the testing of our products; however, if any of our products contain defects, we may be required to incur additional development and remediation costs, pursuant to warranty and indemnification provisions in our customer contracts and purchase orders. These problems may divert our technical and other resources from other product development efforts and could result in claims against us by our customers or others, including liability for costs associated with product recalls, which may adversely impact our operating results. We may also be subject to customer indemnity claims. Our customers have on occasion been sued, and may in the future be sued by third parties with respect to infringement or other product matters, and those customers may seek indemnification from us under the terms and conditions of our sales contracts with them. In certain cases, our potential indemnification liability may be significant. There can be no assurance that we are adequately insured to protect against all claims and potential liabilities. If any of our products contains defects, or has reliability, quality or compatibility problems, our reputation may be damaged, which could make it more difficult for us to sell our products to existing and prospective customers and could adversely affect our operating results.

We have manufacturing processes that utilize a substantial amount of technology as the fabrication of integrated circuits is a highly complex and precise process. Minute impurities, contaminants in the manufacturing environment, difficulties in the fabrication process, defects in the masks used in the wafer manufacturing process, manufacturing equipment failures, wafer breakage or other factors can cause a substantial percentage of wafers to be rejected or numerous dice on each wafer to be nonfunctional. While we have significant expertise in semiconductor manufacturing, it is possible that some processes could become unstable. This instability could result in manufacturing delays and product shortages, which could have a material adverse effect on our operating results.

Table of Contents

We are involved in frequent litigation, including regarding intellectual property rights, which could be costly to bring or defend and could require us to redesign products or pay significant royalties.

The semiconductor industry is characterized by frequent claims and litigation involving patent and other intellectual property rights, including claims arising under our contractual obligations to indemnify our customers. Other companies or individuals have obtained patents covering a variety of semiconductor designs and processes, and we might be required to obtain licenses under some of these patents or be precluded from making and selling infringing products, if those patents are found to be valid. From time to time, we receive claims from third parties asserting that our products or processes infringe their patents or other intellectual property rights. In the event a third party makes a valid intellectual property claim against us and a license is not available to us on commercially reasonable terms, or at all, we could be forced either to redesign or to stop production of products incorporating that intellectual property, and our operating results could be materially and adversely affected. Litigation may be necessary to enforce our patents or other of our intellectual property rights or to defend us against claims of infringement, and this litigation could be costly and divert the attention of our key personnel. We could be subject to warranty or product liability claims that could lead to significant costs and expenses as we defend those claims or pay damage awards. There can be no assurance that we are adequately insured to protect against all claims and potential liabilities. We may incur costs and expenses relating to a recall of our customers' products due to an alleged failure of components we supply. An adverse outcome in litigation could have a material adverse effect on our financial position or on our operating results or cash flows in the period in which the litigation is resolved.

We may be unable to adequately protect our proprietary rights, which may limit our ability to compete effectively.

Our success depends, in part, on our ability to protect our intellectual property. We primarily rely on patent, mask work, copyright, trademark and trade secret laws, as well as nondisclosure agreements and other methods, to protect our proprietary technologies and processes. Despite our efforts to protect our proprietary technologies and processes, it is possible that competitors or other unauthorized third parties may obtain, copy, use or disclose our technologies, products and processes. Moreover, the laws of foreign countries in which we design, manufacture, market and sell our products may afford little or no effective protection of our proprietary technology.

There can be no assurance that the claims allowed in our issued patents will be sufficiently broad to protect our technology. In addition, any of our existing or future patents may be challenged, invalidated or circumvented. As such, any rights granted under these patents may not provide us with meaningful protection. We may not have foreign patents or pending applications corresponding to our U.S. patents and applications. Even if foreign patents are granted, effective enforcement in foreign countries may not be available. If our patents do not adequately protect our technology, our competitors may be able to offer products similar to ours. Our competitors may also be able to develop similar technology independently or design around our patents.

We generally enter into confidentiality agreements with our employees, consultants and strategic partners. We also try to control access to and distribution of our technologies, documentation and other proprietary information. Despite these efforts, internal or external parties may attempt to copy, disclose, obtain or use our products or technology without our authorization. Also, former employees may seek employment with our business partners, customers or competitors, and there can be no assurance that the confidential nature of our proprietary information will be maintained in the course of such future employment.

If we do not retain our key personnel, our ability to execute our business strategy will be adversely affected.

Our continued success depends to a significant extent upon the recruitment, retention and effective succession of our executive officers and key management and technical personnel, particularly our experienced engineers. The competition for these employees is intense. The loss of the services of one or more of our key personnel could have a material adverse effect on our operating results. In addition, there could be a material adverse effect on our business should the turnover rates for engineers and other key personnel increase significantly or if we are unable to continue to attract qualified personnel. We do not maintain any key person life insurance policy on any of our officers or employees.

To remain competitive, we may need to acquire other companies, purchase or license technology from third parties, or enter into other strategic transactions in order to introduce new products or enhance our existing products.

An element of our business strategy involves expansion through the acquisitions of businesses, assets, products or technologies that allow us to complement our existing product offerings, expand our market coverage, increase our engineering workforce or enhance our technological capabilities. We may not be able to find businesses that have the technology or resources we need and, if we find such businesses, we may not be able to purchase or license the technology or resources on commercially favorable terms or at all. Acquisitions and technology licenses are difficult to identify and complete for a number

[Table of Contents](#)

of reasons, including the cost of potential transactions, competition among prospective buyers and licensees, the need for regulatory approvals, and difficulties related to integration efforts. In order to finance a potential transaction, we may need to raise additional funds by issuing securities or borrowing money. We may not be able to find financing on favorable terms, and the sale of our stock may result in the dilution of our existing shareholders or the issuance of securities with rights that are superior to the rights of our common shareholders.

Acquisitions also involve a number of risks, including:

- difficulty integrating acquired technologies, operations and personnel with our existing businesses;
- diversion of management attention in connection with both negotiating the acquisitions and integrating the assets;
- strain on managerial and operational resources as management tries to oversee larger operations;
- the future funding requirements for acquired companies, which may be significant;
- potential loss of key employees;
- exposure to unforeseen liabilities of acquired companies; and
- increased risk of costly and time-consuming litigation.

If we are unable to successfully address these risks, we may not realize some or all of the expected benefits of the acquisition, which may have an adverse effect on our business plans and operating results.

We rely on manufacturing capacity located in geologically unstable areas, which could affect the availability of supplies and services.

We, like many companies in the semiconductor industry, rely on internal manufacturing capacity, wafer fabrication foundries and other sub-contractors in geologically unstable locations around the world. This reliance involves risks associated with the impact of earthquakes on us and the semiconductor industry, including temporary loss of capacity, availability and cost of key raw materials, utilities and equipment and availability of key services, including transport of our products worldwide. Any prolonged inability to utilize one of our manufacturing facilities, or those of our subcontractors or third-party wafer fabrication foundries, as a result of fire, natural disaster, unavailability of utilities or otherwise, would have a material adverse effect on our results of operations and financial condition.

We are exposed to business, economic, political, legal and other risks through our significant worldwide operations.

We have significant operations and manufacturing facilities outside the United States, including in Ireland and the Philippines. During the first three months of fiscal 2010, approximately 81% of our revenue was derived from customers in international markets. Although we engage in hedging transactions to reduce our exposure to currency exchange rate fluctuations, there can be no assurance that our competitive position will not be adversely affected by changes in the exchange rate of the United States dollar against other currencies. Potential interest rate increases, as well as high energy costs, could have an adverse impact on industrial and consumer spending patterns and could adversely impact demand for our products. While a majority of our cash is generated outside the United States, we require a substantial amount of cash in the United States for operating requirements, stock repurchases, cash dividends and acquisitions. If we are unable to address our U.S. cash requirements through operations, by efficient and timely repatriations of overseas cash, through borrowings under our current credit facility or from other sources of cash obtained at an acceptable cost, our business strategies and operating results could be adversely affected.

In addition to being exposed to the ongoing economic cycles in the semiconductor industry, we are also subject to the economic, political and legal risks inherent in international operations, including the risks associated with the recent crisis in global credit and financial markets, ongoing uncertainties and political and economic instability in many countries around the world, as well as economic disruption from acts of terrorism and the response to them by the United States and its allies. Other business risks associated with international operations include increased managerial complexities, air transportation disruptions, expropriation, currency controls, currency exchange rate movement, additional costs related to foreign taxes, tariffs and freight rate increases, exposure to different business practices and legal standards, particularly with respect to price protection, intellectual property and environmental compliance, trade and travel restrictions, pandemics, import and export license requirements and restrictions, difficulties in staffing and managing worldwide operations, and accounts receivable collections.

Table of Contents

We expect to continue to expand our business and operations in China. Our success in the Chinese markets may be adversely affected by China's continuously evolving laws and regulations, including those relating to taxation, import and export tariffs, currency controls, environmental regulations, and intellectual property rights and enforcement of those rights. Enforcement of existing laws or agreements may be inconsistent. In addition, changes in the political environment, governmental policies or U.S.-China relations could result in revisions to laws or regulations or their interpretation and enforcement, increased taxation, restrictions on imports, import duties or currency revaluations, which could have an adverse effect on our business plans and operating results.

Our operating results are dependent on the performance of independent distributors.

A significant portion of our sales are through independent distributors that are not under our control. These independent distributors generally represent product lines offered by several companies and thus could reduce their sales efforts applied to our products or terminate their representation of us. We generally do not require letters of credit from our distributors and are not protected against accounts receivable default or bankruptcy by these distributors. Our inability to collect open accounts receivable could adversely affect our operating results. Termination of a significant distributor, whether at our initiative or the distributor's initiative, could disrupt our current business, and if we are unable to find suitable replacements, our operating results could be adversely affected.

We are subject to increasingly strict environmental regulations, which could increase our expenses and affect our operating results.

Our industry is subject to increasingly strict environmental regulations that control and restrict the use, transportation, emission, discharge, storage and disposal of certain chemicals, gases and other substances used or produced in the semiconductor manufacturing process. Public attention on environmental controls has continued to increase, and our customers routinely include stringent environmental standards in their contracts with us. Changes in environmental regulations may require us to invest in potentially costly pollution control equipment or alter the way our products are made. In addition, we use hazardous and other regulated materials that subject us to risks of strict liability for damages caused by accidental releases, regardless of fault. Any failure to control such materials adequately or to comply with regulatory restrictions or contractual obligations could increase our expenses and adversely affect our operating results.

New climate change regulations could require us to change our manufacturing processes or obtain substitute materials that may cost more or be less available for our manufacturing operations. In addition, new restrictions on carbon dioxide or other greenhouse gas emissions could result in significant costs for us. Greenhouse gas legislation has been introduced in Massachusetts and the United States legislatures and we expect increased worldwide regulatory activity in the future. The cost of complying, or of failing to comply, with these and other climate change and emissions regulations could have an adverse effect on our business plans and operating results.

If we are unable to generate sufficient cash flow, we may not be able to service our debt obligations, including making payments on our \$375 million senior unsecured notes.

In the third quarter of fiscal 2009, we issued in a public offering \$375 million aggregate principal amount of 5.0% senior unsecured notes due July 1, 2014. Our ability to make payments of principal and interest on our indebtedness when due depends upon our future performance, which will be subject to general economic conditions, industry cycles and financial, business and other factors affecting our consolidated operations, many of which are beyond our control. If we are unable to generate sufficient cash flow from operations in the future to service our debt, we may be required to, among other things:

- seek additional financing in the debt or equity markets;
- refinance or restructure all or a portion of our indebtedness, including the notes;
- sell selected assets;
- reduce or delay planned capital expenditures; or
- reduce or delay planned operating expenditures.

Table of Contents

Such measures might not be sufficient to enable us to service our debt, including the notes, which could negatively impact our financial results. In addition, any such financing, refinancing or sale of assets might not be available on economically favorable terms.

Restrictions in our credit facility and outstanding debt instruments may limit our activities.

Our current credit facility and our 5.0% senior unsecured notes impose, and future debt instruments to which we may become subject may impose, restrictions that limit our ability to engage in activities that could otherwise benefit our company, including to undertake certain transactions, to create certain liens on our assets and to incur certain subsidiary indebtedness. Our ability to comply with these financial restrictions and covenants is dependent on our future performance, which is subject to prevailing economic conditions and other factors, including factors that are beyond our control such as foreign exchange rates, interest rates, changes in technology and changes in the level of competition. In addition, our credit facility requires us to maintain compliance with specified financial ratios. If we breach any of the covenants under our credit facility or the indenture governing our outstanding notes and do not obtain appropriate waivers, then, subject to applicable cure periods, our outstanding indebtedness thereunder could be declared immediately due and payable.

Our stock price may be volatile.

The market price of our common stock has been volatile in the past and may be volatile in the future, as it may be significantly affected by the following factors:

- crises in global credit and financial markets;
- actual or anticipated fluctuations in our revenue and operating results;
- changes in financial estimates by securities analysts or our failure to perform in line with those estimates or our published guidance;
- changes in market valuations of other semiconductor companies;
- announcements by us or our competitors of significant new products, technical innovations, acquisitions or dispositions, litigation or capital commitments;
- departures of key personnel;
- actual or perceived noncompliance with corporate responsibility or ethics standards by us or any of our employees, officers or directors; and
- negative media publicity targeting us or our competitors.

The stock market has historically experienced volatility, especially within the semiconductor industry, that often has been unrelated to the performance of particular companies. These market fluctuations may cause our stock price to fall regardless of our operating results.

ITEM 2. Unregistered Sales of Equity Securities and Use of Proceeds**Issuer Purchases of Equity Securities**

Period	Total Number of Shares Purchased (a)	Average Price Paid Per Share (b)	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs (c)	Approximate Dollar Value of Shares that May Yet Be Purchased Under the Plans or Programs (d)
November 1, 2009 through November 28, 2009	477	\$28.18	—	\$91,614,067
November 29, 2009 through December 26, 2009	793,810	\$30.26	—	\$91,614,067
December 27, 2009 through January 30, 2010	310	\$29.47	—	\$91,614,067
Total	<u>794,597</u>	\$30.26	<u>—</u>	\$91,614,067

- (a) Includes 794,597 shares surrendered to us to satisfy the exercise price of options, and to satisfy employee tax obligations upon vesting of restricted stock granted to them under our equity compensation plans.
- (b) The average stock price for each share surrendered to us to satisfy the exercise price of options, and to satisfy employee tax obligations upon vesting of restricted stock granted to them under our equity compensation plans.
- (c) There were no repurchases pursuant to our stock repurchase program.
- (d) Repurchased pursuant to the stock repurchase program publicly announced on August 12, 2004. On June 6, 2007, our Board of Directors authorized the repurchase by us of an additional \$1 billion of our common stock, increasing the total amount of our common stock we are authorized to repurchase under the program to \$4 billion. Under the repurchase program, we may repurchase outstanding shares of our common stock from time to time in the open market and through privately negotiated transactions. Unless terminated earlier by resolution of our Board of Directors, the repurchase program will expire when we have repurchased all shares authorized for repurchase under the repurchase program.

ITEM 6. Exhibits

The exhibits listed in the Exhibit Index immediately preceding the exhibits are filed as part of this Quarterly Report on Form 10-Q and such Exhibit Index is incorporated herein by reference.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.

† Filed herewith

Attached as Exhibit 101 to this report are the following formatted in XBRL (Extensible Business Reporting Language): (i) Condensed Consolidated Statements of Income for the three months ended January 30, 2010 and January 31, 2009, (ii) Condensed Consolidated Balance Sheets at January 30, 2010 and October 31, 2009, (iii) Condensed Consolidated Statements of Cash Flows for the nine months ended January 30, 2010 and January 31, 2009 and (iv) Notes to Condensed Consolidated Financial Statements.

In accordance with Rule 406T of Regulation S-T, the XBRL-related information in Exhibit 101 to this Quarterly Report on Form 10-Q is deemed not filed or part of a registration statement or prospectus for purposes of sections 11 or 12 of the Securities Act, is deemed not filed for purposes of Section 18 of the Exchange Act, and otherwise is not subject to liability under these sections.

ANALOG DEVICES, INC.

Amendment No. 4 to the 2006 Stock Incentive Plan, as amended

The 2006 Stock Incentive Plan, as amended by Amendment No. 1, Amendment No. 2 and Amendment No. 3 thereto (the "Plan") of Analog Devices, Inc. (the "Corporation"), is hereby amended as set forth below:

That Section 8(c) of the Plan is amended by adding the phrase "or, in the discretion of the Board, when the granting of such Restricted Stock Units in any foreign jurisdiction is delayed in connection with registration or approval to be obtained in connection with such Restricted Stock Units" after the phrase "or retirement of the Participant".

Except to the extent amended hereby, all of the terms, provisions and conditions set forth in the Plan are hereby ratified and confirmed and shall remain in full force and effect. The Plan and this amendment shall be read and construed together as a single instrument.

Approved by the Board of Directors on December 1, 2009

ANALOG DEVICES, INC.

Amendment No. 5 to the 2006 Stock Incentive Plan, as amended

The 2006 Stock Incentive Plan, as amended by Amendments 1 through 4 thereto (the "Plan") of Analog Devices, Inc. (the "Corporation"), is hereby amended as set forth below:

1. Section 11(b)(4) shall be renumbered to be Section 11(b)(5) and remain otherwise unchanged.
2. Section 11(b)(3) shall be deleted and replaced in its entirety with the following:

(3) Effect on Restricted Stock Awards

(a) *Reorganization Event.* Upon the occurrence of a Reorganization Event (regardless of whether such event also constitutes a Change in Control Event), the repurchase and other rights of the Company under each outstanding Restricted Stock Award shall inure to the benefit of the Company's successor and shall apply to the cash, securities or other property which the Common Stock was converted into or exchanged for pursuant to such Reorganization Event in the same manner and to the same extent as they applied to such Restricted Stock Award.

(b) *Change in Control Event.* Upon the occurrence of a Change in Control Event (regardless of whether such event also constitutes a Reorganization Event), except to the extent specifically provided to the contrary in the instrument evidencing any Restricted Stock Award or any other agreement between a Participant and the Company, and notwithstanding anything to the contrary in the Plan, the vesting schedule of all Restricted Stock Awards shall be accelerated in part so that one-half of the number of shares that would otherwise have first become free from conditions or restrictions on any date after the date of the Change in Control Event shall immediately become free from conditions or restrictions. Subject to the following sentence, the remaining one-half of such number of shares shall continue to become free from conditions or restrictions in accordance with the original schedule set forth in such Award, with one-half of the number of shares that would otherwise have become free from conditions or restrictions on each subsequent vesting date in accordance with the original schedule becoming free from conditions or restrictions on each subsequent vesting date. In addition, each such Award shall immediately become free from all conditions or restrictions if, on or prior to the first anniversary of the date of the consummation of the Change in Control Event, the Participant's employment with the Company or the acquiring or succeeding corporation is terminated for

Good Reason by the Participant or is terminated without Cause by the Company or the acquiring or succeeding corporation.

(4) Effect on Restricted Stock Unit Awards

(a) *Reorganization Event.* Upon the occurrence of a Reorganization Event (regardless of whether such event constitutes a Change in Control Event), the Board shall provide that all outstanding Restricted Stock Unit Awards shall be assumed, or an equivalent award providing for Restricted Stock Units shall be substituted, by the acquiring or succeeding corporation (or an affiliate thereof); *provided that*, notwithstanding anything to the contrary in the Plan, if such Reorganization Event also constitutes both a Change in Control Event and a “change in control event” within the meaning of Treasury Regulation Section 1.409A-3(i)(5)(i), except to the extent specifically provided to the contrary in the instrument evidencing any Award or any other agreement between the Participant and the Company, (A) one-half of the number of Restricted Stock Units that vest after the Reorganization Event shall immediately vest in full as of the consummation of the Reorganization Event and, subject to (B) below, the remaining one-half of the number of unvested Restricted Stock Units shall continue to vest in accordance with the original schedule set forth in such Restricted Stock Unit Award, with one-half of the number of Restricted Stock Units that would otherwise have become vested on each subsequent vesting date in accordance with the original schedule becoming vested on each subsequent vesting date and (B) such assumed or substituted Restricted Stock Unit award shall immediately become vested in full if, on or prior to the first anniversary of the date of the consummation of the Reorganization Event, the Participant’s employment with the Company or the acquiring or succeeding corporation is terminated for Good Reason (as defined in Section 11(b)(4)(c) below) by the Participant or is terminated without Cause by the Company or the acquiring or succeeding corporation.

For purposes hereof, a Restricted Stock Unit Award shall be considered to be assumed if, following consummation of the Reorganization Event, the Restricted Stock Unit Award confers the right to receive upon vesting and conversion for each Restricted Stock Unit immediately prior to the consummation of the Reorganization Event, the consideration (whether cash, securities or other property) received as a result of the Reorganization Event by holders of Common Stock for each share of Common Stock held immediately prior to the consummation of the Reorganization Event (and if holders were offered a choice of consideration, the type of consideration chosen by the holders of a majority of the outstanding shares of Common Stock); *provided, however*, that if the consideration received as a result of the Reorganization Event is not solely common stock of the acquiring or succeeding corporation (or an affiliate thereof) (or if holders of Common Stock were offered a choice of consideration and the type of consideration chosen by the holders of a majority of the outstanding shares of Common Stock was not common stock of the acquiring or succeeding corporation), the Company may, with the consent of the acquiring or succeeding

corporation, provide for the consideration to be received upon the vesting and conversion of Restricted Stock Units to consist solely of common stock of the acquiring or succeeding corporation (or an affiliate thereof) equivalent in value (as determined by the Board of Directors) to the per share consideration received by holders of outstanding shares of Common Stock as a result of the Reorganization Event.

Notwithstanding the foregoing and anything to the contrary in the Plan, if the acquiring or succeeding corporation (or an affiliate thereof) does not agree to assume, or substitute for, a Restricted Stock Unit Award, or in the event of a liquidation or dissolution of the Company, the Board of Directors shall, upon written notice to the Participant, (A) provide that all then unvested Restricted Stock Units that are exempt from Section 409A will vest in full as of immediately prior to the Reorganization Event; provided, however, that in the event of a Reorganization Event under the terms of which holders of Common Stock will receive upon consummation thereof a cash payment for each share of Common Stock surrendered pursuant to such Reorganization Event (the "Acquisition Price"), then the Board of Directors may instead provide that all such unvested Restricted Stock Units shall terminate upon consummation of such Reorganization Event and that the Participant shall receive, in exchange therefor, a cash payment equal to the amount equal to the Acquisition Price multiplied by the number of shares of Common Stock issuable under such unvested Restricted Stock Units; and (B) provide that all then unvested Restricted Stock Units that are not exempt from Section 409A shall be treated in the same manner Restricted Stock Units subject to clause (A) if such Reorganization Event also is a "change in control event" as described in Treasury Regulation Section 1.409A-3(i)(5)(i) and if not, shall be terminated as of the Reorganization Event without any payment for the unvested Restricted Stock Units.

(b) *Change in Control Event that is not a Reorganization Event.* Upon the occurrence of a Change in Control Event that also is a "change in control event" within the meaning of Treasury Regulation Section 1.409A-3(i)(5)(i) that does not constitute a Reorganization Event, except to the extent specifically provided to the contrary in the instrument evidencing any award or any other agreement between the Participant and the Company, (A) one-half of the number of Restricted Stock Units that vest after the Change in Control Event shall immediately vest in full as of the consummation of the Change in Control Event and be converted and delivered to the Participant and, subject to (B) below, the remaining one-half of the number of unvested Restricted Stock Units shall continue to vest in accordance with the original schedule set forth in such Restricted Stock Unit Award, with one-half of the number of Restricted Stock Units that would otherwise have become vested on each subsequent vesting date in accordance with the original schedule becoming vested on each subsequent vesting date and (B) such Restricted Stock Unit Award shall immediately become vested in full if, on or prior to the first anniversary of the date of the consummation of the Change in Control Event, the Participant's employment with

the Company is terminated for Good Reason (as defined in Section 11(b)(4)(c) below) by the Participant or is terminated without Cause by the Company.

(c) *Definition of Good Reason for the purposes this Section 11(b)(4) of the Plan.*

(i) For any Restricted Stock Unit Awards granted on or before December 10, 2009, "Good Reason" shall mean good reason as defined in Section 11(b)(1)(c) of the Plan.

(ii) For any Restricted Stock Unit Awards granted after December 10, 2009, "Good Reason" shall mean any significant diminution in the Participant's title, authority, or responsibilities from and after such Reorganization Event or Change in Control Event, as the case may be, or any material reduction in the annual cash compensation payable to the Participant from and after such Reorganization Event or Change in Control Event, as the case may be, or the relocation of the place of business at which the Participant is principally located to a location that is greater than 50 miles from its location immediately prior to such Reorganization Event or Change in Control Event. Notwithstanding the occurrence of any such event or circumstance, such occurrence shall not be deemed to constitute Good Reason unless (x) the Participant gives the Company notice of termination no more than 90 days after the initial existence of such event or circumstance, (y) such event or circumstance has not been fully corrected by the Company within 30 days of the Company's receipt of such notice and (z) the Participant's termination occurs within 60 days following the Company's receipt of such notice.

3. Section 13(f) shall be deleted in its entirety and replaced with the following

(f) *Section 409A.*

(1) It is the intent of the Company that any deferral of the receipt of the payment of cash or the delivery of shares of Common Stock that the Board may permit or require and Award that is granted that is subject to Section 409A of the Code ("Section 409A") comply with the requirements of Section 409A; provided that no guaranty is made by the Company to Participants that Awards will so comply.

(2) The following provisions apply to each Award granted or outstanding under this Plan that are intended to comply with (and not be exempt from) Section 409A: (i) each delivery of shares or cash under each such Award shall be treated as a separate payment for purposes of Section 409A; (ii) notwithstanding anything in the Award or in the Plan to the contrary, neither the Participant nor the Company may accelerate or defer the delivery of the cash or shares under the Award to a date other than those specified in the Award unless specifically permitted or required by Section 409A; (iii) if a Participant becomes a "specified employee" of the Company (within the meaning of Section 409A) and any of the shares or cash to be delivered under each such Award that may be delivered on

account of the Participant's "separation from service" (within the meaning of Section 409A), then any shares or cash that otherwise would have been delivered within the six month period following the separation from service shall be delivered on the date that is six months and one day following the separation from service, with any remaining delivery of shares or cash to be made in accordance with the terms of the Award.

4. Except to the extent amended hereby, all of the terms, provisions and conditions set forth in the Plan are hereby ratified and confirmed and shall remain in full force and effect. The Plan and this amendment shall be read and construed together as a single instrument.

Approved by the Board of Directors on December 17, 2009

CERTIFICATION

I, Jerald G. Fishman, certify that:

1. I have reviewed this quarterly report on Form 10-Q of Analog Devices, Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
