FORWARD LOOKING STATEMENTS

This presentation contains forward-looking statements that address a variety of subjects, including, for example our statements and projections regarding our future financial performance, momentum, and business resilience; anticipated growth and trends in our business; demand for our product solutions, offerings, capabilities and applications and the importance of our product offerings and technologies to our customers; new or improved innovative solutions, products, technologies, and competitive advantages; future expectations regarding semiconductor trends, digitalization, growth markets, data storage and data processing; future environmental projections, actions, and goals including energy consumption, increasing or decreasing use of renewables, and timelines for reaching net zero emissions; expected future revenue, operating margin, gross margin, earnings per share, free cash flow, CapEx and other future financial results; expected market trends, market share gains, long-term value and growth, operating leverage, capacity, production and inventory levels; our plans to pay dividends, repurchase stock or service our outstanding debt; and other future events. Statements that are not historical facts, including statements about our beliefs, plans and expectations, are forward-looking statements. Such statements are based on our current expectations and are subject to a number of factors and uncertainties, which could cause actual results to differ materially from those described in the forward-looking statements. The following important factors and uncertainties, among others, could cause actual results to differ materially from those described in these forward-looking statements: the effects of business, economic, political, legal, and regulatory uncertainty or conflicts upon our global operations; changes in demand for semiconductors and the related changes in demand and supply for our products; manufacturing delays, product availability, and supply chain disruptions; our future liquidity, capital needs and capital expenditures; our development of technologies and research and development investments; our ability to compete successfully in the markets in which we operate; changes in our estimates of our expected tax rates based on current tax law; adverse results in litigation matters; the risk that we will be unable to retain and hire key personnel; security breaches or other cyber incidents; unanticipated difficulties or expenditures relating to integrating Maxim Integrated Products, Inc. (Maxim); uncertainty as to the long-term value of our common stock; and the risk that expected benefits, synergies and growth prospects of acquisitions, including those from our acquisition of Maxim, may not be fully achieved in a timely manner, or at all. For additional information about factors that could cause actual results to differ materially from those described in the forward-looking statements, please refer to our filings with the Securities and Exchange Commission, including the risk factors contained in our most recent annual report on Form 10-K and quarterly report on form 10-Q. Forward-looking statements represent management’s current expectations and are inherently uncertain. Except as required by law, we do not undertake any obligation to update forward-looking statements made by us to reflect subsequent events or circumstances.

NON-GAAP RECONCILIATIONS

This presentation includes non-GAAP financial measures that have been adjusted in order to provide investors with information regarding our results of operations, business trends and financial goals. Reconciliation of these non-GAAP measures to their most directly comparable GAAP measures can be found in the appendix.

$12B+
ADI: AN INNOVATIVE, RESILIENT ENTERPRISE WITH RICH GROWTH OPPORTUNITIES & AN INDUSTRY LEADING FINANCIAL MODEL

- **Innovation**
  - R&D: >$1.6B in FY23; >30% greater than peer average
  - ASPs: >3x industry average
  - Gross margin premium: 73% adjusted gross margin, industry leading for a semiconductor company

- **Growth**
  - Attractive end market mix: ~90% B2B (Industrial 53%, Automotive 24%, Communications 13%)
  - Secular growth: ~25% of revenue aligned to high growth markets fueled by increasing digitalization and sustainability goals
  - Revenue synergy: $1B+ by FY27 through cross-sell, co-design, and power opportunity

- **Resiliency**
  - Breadth & diversity: 125K+ end customers with none >5% of total sales, and ~75K products with >80% of revenue derived from products that individually contribute 0.1% or less of total sales
  - Recurring revenue: ~50% of revenue comes from products launched at least a decade ago
  - Dynamic hybrid manufacturing: Targeting 70% flexible capacity between internal and external sites

THE EVOLUTION AND FUTURE OF INFORMATION & COMMUNICATION TECHNOLOGY ENABLED BY SEMICONDUCTOR INNOVATION

MAINFRAMES
1960 & 1970s
Enterprise productivity
• VLSI / MOS-based ICs
• Microprogramming

PC / INTERNET
1980s & 1990s
Personal productivity, entertainment and information access
• Microprocessors
• Standardized SW ecosystems

MOBILE / CLOUD
2000s & 2010s
Democratization of content creation & consumption
• Handheld connectivity
• Datacenter compute
• AI “spring”

INTELLIGENT DEVICES
2020s & 2030s
Core functionality enhanced by contextual, pervasive intelligence
• Cohesion of analytics, communications and sensing
• Cloud-enabled, edge-enhanced

AUTONOMOUS & PERSONALIZED SYSTEMS
2030s onwards
True autonomy, seamless and secure HMI, infinite personalization
• Increased ability to manipulate elemental blocks (e.g., photons, molecules, DNA, etc.)
• Artificial General Intelligence (AGI), machine-to-machine communication
• Extended reality
• Impetus for technology to address climate change
SEMICONDUCTOR GROWTH ACCELERATING

SEMICONDUCTOR INDUSTRY SALES ARE FORECAST TO DOUBLE AND REACH $1T BY 2030

AUTONOMOUS MOBILITY

IMMERSIVE SENSORY EXPERIENCE

Semiconductor Industry: Analog versus Digital

- Analog design is more complex and requires more diverse skillsets due to the heterogeneous nature of real-world phenomena compared to the binary digital world.
- Analog talent is difficult to replicate as skill deepens with tenure, requiring tacit knowledge. Additionally, the supply of analog engineer graduates is lower than digital engineers.
- Analog requires lower capital investment as the race down the lithography curve using more expensive equipment is of less importance.
- Analog profit streams are more resilient due to vast product mix and very long lifecycles, especially in B2B markets (Industrial, Auto, Communications).
- Analog employs a breadth of unique processes, optimized for processing electrical currents, where digital is optimized for density and speed.
- Analog processes & equipment have less obsolescence risk due to the use of trailing edge lithography.

TTM Sales Growth vs 2013 (10 years)¹

8% Analog 10yr CAGR
>30% vs Digital

(>90% of ADI’s sales derived from Analog ICs)

KEY SEMICONDUCTOR MEGATREND: DIGITALIZATION

DATA'S EXPONENTIAL GROWTH IS UNDENIABLE

- Edge computing offers unparalleled safety and speed to enable emerging low-latency applications including AR/VR, the metaverse, and autonomous driving
- Currently less than 10% of business data is created and processed at the edge of the network, but according to Gartner that is expected to reach 75% by 2025

Bridging the physical and cyber worlds
KEY SEMICONDUCTOR MEGATRENDS: SUSTAINABILITY & EFFICIENCY

GLOBAL ENERGY CONSUMPTION¹ IS EXPECTED TO TRIPLE BY 2050² WHILE THE WORLD RACES TO NET ZERO CO₂ EMISSIONS FROM FOSSIL FUELS³, ⁴

~70% of global GDP (governments and corporations) have pledged Net Zero commitments⁵

4. Note: This measures CO2 emissions from fossil fuels and cement production only – land use change is not included. ‘Statistical differences’ (included in the GCP dataset) are not included here.

GLOBAL PRIMARY ENERGY CONSUMPTION AND CO₂ EMISSIONS FROM FOSSIL FUELS

- Global Primary Energy Consumption
- CO₂ Emissions from Fossil Fuels

TWh Global Energy Consumption
Billion Tons CO₂ Emissions from Fossil Fuels

0 300,000 330,000 360,000 400,000

14
ADI’S INNOVATIONS DRIVE EFFICIENCY

ELECTRIC VEHICLES

~100M tons of avoided emissions annually from vehicles equipped with ADI’s battery management systems

GRID DECARBONIZATION

~30% more battery life in renewable energy storage systems, enabled by ADI’s battery management products

5G NETWORKS

~500M tons of avoided emissions expected by fiscal year 2030, enabled in part by ADI’s transceivers & algorithms

INDUSTRY 4.0

~40% reduced motor energy consumption in factory lines using ADI’s precision signal chain & power management tech

Note: All figures are ADI internal estimates.
MEGATRENDS FUELING A HOST OF CONCURRENT SECULAR GROWTH MARKETS

### INDUSTRY 4.0
- Industrial robots have **DOUBLED IN THE LAST 5 YEARS**¹
- AMRs (autonomous mobile robots) which have 2x+ semi content vs traditional robots, forecasted to **INCREASE 6X IN NEXT 5 YEARS**²

### DIGITAL HEALTHCARE
- Healthcare spend has grown from 15% of U.S. GDP to ~20% LAST 20 YEARS³. The semiconductor industry share of this spend has increased 14% CAGR LAST 5 YEARS⁴
- Healthcare share of GDP IS EXPECTED TO CONTINUE TO GROW driven by aging population

### ADVANCED CONNECTIVITY
- Connected devices compounding at a double digit CAGR and expected to reach ~$30B BY 2030¹¹
- 5G is forecast to cover ~75% OF THE WORLD’S POPULATION IN 2027⁶

### ELECTRIFICATION ECOSYSTEM
- By 2030 EVs expected to be ~45% OF LIGHT VEHICLE SALES vs ~13% today⁵
- Renewable energy in the U.S. **INCREASED 42% FROM 2010 TO 2020⁷** and is expected to **DOUBLE BY 2050⁸**

### AUTONOMOUS MOBILITY
- Automotive HD cameras forecast to **INCREASE 3X+ IN NEXT 5 YEARS⁹**
- Level 4 automation expected to be featured in **10% OF NEW CARS SOLD IN 2035¹⁰**

### IMMERSIVE SENSORY EXPERIENCE
- Automotive Speakers, HD Displays and Microphones forecasted to **INCREASE 2-3X IN NEXT 5 YEARS⁹**
- AR (Augmented Reality) hardware expected to grow at **40% CAGR THROUGH 2027¹¹**

~25% of ADI FY23 revenue aligned to these high growth markets

---

Note: See Appendix for all source references indicated by footnotes.
MULTIPLE COMPETITIVE ADVANTAGES DEFENDING & EXTENDING ADI’s INDUSTRY POSITION

TECHNOLOGY

HIGH PERFORMANCE
Analog, mixed-signal, power, processing, & sensing

BREADTH & DEPTH
~75K products spanning components to sub-systems

WORLD-CLASS TALENT
~13K engineers (hardware, software, systems, & domain experts), avg tenure of 20+ yrs

R&D SCALE & IP
$1.6B+ in FY23; >30% higher than peer average, ~8K patents

MANUFACTURING

RESILIENT HYBRID MODEL
70%+ flexible capacity enables optionality & greater control of internal factory loadings

OPERATIONAL AGILITY
Ability to quickly scale foundry capacity in upswings

TECHNOLOGICAL BREADTH
Solutions from 7 nanometers to 7 microns

SUPPLY DIVERSIFICATION
10+ countries, 50+ sites, 20+ external partners

CUSTOMER

LONG TERM PARTNERS
Premier technology with vast domain knowledge, shaping long-term product roadmaps

SYSTEM ADVANTAGES
High performance portfolio drives greater system efficiency

TIME TO MARKET
Cutting edge solutions that tame complexity, accelerating product development

BEST-IN-CLASS SUPPORT
Highly technical salesforce & enablement tools. Engaged support across multiple channels

FINANCIAL

DIVERSE REVENUE BASE
>80% of revenue from products that individually contribute 0.1% or less of total sales

PRODUCT LONGEVITY
Average product life 10+ years

CUSTOMER BREADTH
125K+ relationships, no end customer >5% of total sales

ROBUST BALANCE SHEET
$1B of cash & equivalents & net leverage ratio <1.0X

1. Expected by end of calendar 2024.
3. Source: Company earnings releases and based on ADI’s fiscal 2023. Peers include: ON semi, Texas Instruments, Infineon, Skyworks, STMicro, Broadcom, Microchip, Maxim, Power Integrated, Qorvo, Monolithic Power, Renesas, and NXP.
4. Refer to the appendix for reconciliations of Non-GAAP financial measures to their most directly comparable GAAP financial measures.
“With all the necessary building blocks, a cadre of world class engineers, and domain experts, ADI has a unique ability to solve the most difficult engineering challenges for a breadth of customers in an increasingly complex world”

Application software & analytics

SUB-SYSTEMS
Integration techniques with embedded software, algorithms, and security

COMPONENTS
Breadth of high-performance ICs

Content per system
ADI DELIVERS MORE THAN SILICON WITH SOLUTIONS

**APOLLO**
- Most complete, high-speed signal processing platform in the industry
- Data conversion speed of >20 giga samples per second, 75db dynamic range
- Nearly 3 billion transistors
- 1.5 million+ lines of embedded code
- Multiple application areas: aerospace, instrumentation, and next gen communications

**PHOTONS-TO-BITS**
- Highly integrated sub-system for CT scan
- Photodetector Sensor with 500 TSVs
- 3500 Interconnects, 6 ADCs
- Advanced, Flip Chip Interconnect
- Reduces radiation dosage while providing the highest fidelity images

**WIRELESS BMS**
- Industry's first wireless battery management system for electric vehicles
- Delivers optimal miles per charge, up to 20% more than peer solution
- Provides modularity and flexibility, enabling OEMs to scale electric vehicle fleets across models
- Highest safety and cyber security certifications

**KERBEROS**
- First complete O-RAN compliant radio unit platform for 5G
- 16nm Software-defined transceiver
- Fully Integrated digital front-end & advanced algorithms
- Advanced Multi-Layer ABF Laminate
- Flip Chip Interconnect
DIVERSIFIED HYBRID MANUFACTURING GIVES ADI ACCESS TO VAST ARRAY OF PROCESS TECHNOLOGIES & ENHANCES SUPPLY ASSURANCE

7 nanometers to 7 microns

HYBRID ADVANTAGES

4-6% CAPEX¹ modest cash outlay to support growth

SUPPLY RESILIENCE globally diverse production

70%+² flexible capacity; defends gross margin

UPSIDE CAPTURE quickly scale foundry capacity

1. Based on long-term financial model provided at April 5, 2022 Investor Day.
2. Expected by end of calendar 2024.
DYNAMIC MANUFACTURING CREATES OPTIONALITY ALLOWING FOR STRUCTURALLY HIGHER UTILIZATIONS, DEFENDING GROSS MARGINS THROUGH CYCLES

Diversified supply sources from different locations to mitigate geography-specific supply risks

Improved delivery times due to geographic diversity of internal fabs and external foundries

Enhanced surged capacity capabilities due to processes qualified in multiple facilities

Internal utilization mitigation in a downturn, defending gross margins

Note: ADI has numerous cross qualified processes, the illustration is simplified to represent a few examples.

**MORE OPPORTUNITY FOR ADI**

BUSINESS OVERVIEW
R&D SCALE AND COMMITMENT KEEPS ADI ON THE CUTTING EDGE

Key ADI Innovations & Product Leadership

- The leader in data conversion (ADCs & DACs), high performance radio frequency (RF), and high performance power management
- Precision signal chain and power leader across industrial applications
- Leader in signal chain & power solutions in both clinical and wellness based wearable vital signs monitoring (VSM)
- Leader in CT and Digital X-Ray with highly integrated system level products
- Leadership position in high performance signal chains across precision, micromodule power, high speed, & RF for high-performance compute, memory and communications test
- First to market with software defined transceiver with a fully integrated digital front end; leadership position at all key equipment manufacturers for 5G
- First to market with wired and wireless battery management systems (BMS) for Electric Vehicles; in 16 of top 20 OEMs
- Leading Audio Connectivity solution (A2B) for automotive; in 18 of top 20 OEMs
- Leading Data Connectivity (GMSL) solution for automotive; in 14 of top 20 OEMS
- First to market with Active Noise Cancellation Technology for Automotive
- Leader in functionally safe power for automotive radars & displays; in 18 of top 20 OEMs

Extraordinary talent base across engineering (analog, digital, software, & systems) combined with domain experts (mathematicians, chemists, biologists, physicists, etc.) fuels continuous innovation

Design Win Pipeline increased double digits in FY23
VAST PRODUCT BREADTH WITH LONG LIFE CYCLES

~50% of ADI revenue is derived from products 10+ years old

~80% of ADI revenue is derived from products that individually contribute 0.1% or less

Note: All figures based on fiscal year 2023.

MARIYA TRICKETT
CHIEF PEOPLE OFFICER
As Chief Executive Officer and Chair of the Board of Directors, Vincent Roche leads ADI to deliver unmatched intelligent edge solutions to several of humanity's most pressing challenges in areas such as communications, advanced manufacturing, healthcare, sustainable energy, consumer, and transportation. Mr. Roche has extended the company’s prominence in the high-performance analog sector through an unyielding commitment to applied innovation, customer centricity, and operational excellence.

Mr. Roche is the third CEO and second Board Chair to lead the company since its founding in 1965. He began his career at ADI in 1988, progressively gaining responsibility over his tenure. Mr. Roche was promoted to President of ADI in 2012, appointed CEO in May 2013, and elected Chair in 2022. During Mr. Roche’s tenure as CEO, the Company’s total shareholder return is 352% (vs. S&P 500 of 211%, or >1.6X the S&P 500 over that time as of October 28, 2023).

Mr. Roche serves on the boards of the Semiconductor Industry Association, the MIT Presidential CEO Advisory Board, and is a member of the Massachusetts High Tech Leadership Council. He holds a bachelor's degree in Electronic Systems and an honorary Doctor of Science (Eng.) from the University of Limerick in Ireland.
As Executive Vice President and President of Global Business Units, Gregory Bryant oversees ADI's global businesses – Industrial & Multi-Markets; Automotive, Cloud & Communications Infrastructure, and Aerospace & Defense; Digital Healthcare; Consumer; Digital Processing; and Software Engineering & Solutions. In this role, Gregory is responsible for growing the business and ensuring close alignment between the company's long-term strategic goals and the evolving technology trends, market needs, and customer priorities.

Gregory has three decades of experience leading and scaling large organizations to deliver profitable growth. Most recently, he was Executive Vice President and General Manager of Intel’s Client Computing Group, where he was responsible for setting the company's PC vision and strategy and fostering six consecutive years of growth in its global PC ecosystem. In this role, Gregory collaborated across the global ecosystem to co-engineer and deliver leading consumer and commercial PC platforms (including Intel® Evo™ and Intel vPro®) that empower people and organizations.

Previously, he held a variety of leadership positions at Intel, including as General Manager of Asia Pacific and Japan and General Manager of the Business Client Platform Division. In these roles Gregory lived in both Beijing and Hong Kong. He began his career as an engineer at Intel in 1992.

He holds a bachelor's degree in electrical engineering from the University of Kansas and a master's degree in program and systems management from Golden Gate University. Originally from the Midwest, Gregory has four children and resides in the Pacific Northwest with his wife, Colleen.
As Vice President, Finance and Interim Chief Financial Officer, Jim Mollica guides the financial strategy for ADI and oversees the company’s global Finance organization, with responsibility for financial management, planning, controls, and reporting.

Most recently, Jim served as Vice President of Finance & Sales Operations for ADI's customer office. He was responsible for business partnership with Anelise & the GCO staff, tactical and 5-year revenue planning, overseeing the financial plan & focusing on maximizing ADI value capture.

Jim joined ADI in 1988 as a recent college graduate and started his career by participating in a management rotational program. Throughout his tenure at ADI, he has undertaken a variety of key financial positions, serving as a business unit financial and operational controller, director of Finance for Global Operations, and serving as Vice President of FP&A and Treasurer. Additionally, he took on the role of interim CFO for Maxim Integrated Products, Inc., overseeing the company's financial integration, just prior to ADI's acquisition of the company.

Jim received his master’s degree in Finance & Operations Management from Bentley University. He is married and has three grown children. He enjoys playing tennis and following the stock market.
Vivek Jain is Executive Vice President of Global Operations & Technology where he is responsible for ADI’s global manufacturing and supply chain operation.

Vivek assumed this position in 2021 following ADI’s acquisition of his previous company, Maxim Integrated Products, Inc., where he served in a similar capacity as the Senior Vice President of the Technology and Manufacturing Group. After joining Maxim in 2007 as Vice President of Fab Operations, he led the transformation of many aspects of the company’s manufacturing supply chain to make it more flexible, nimble, and resilient.

Vivek’s additional experience includes serving as a Plant Manager at Intel’s Technology Development and Manufacturing facility in Santa Clara, CA, where he oversaw the process technology development and high-volume manufacturing of deep sub-micron logic and Flash memory technologies. He has also held roles at VLSI Technology Inc. and National Semiconductor.

Vivek has published more than 30 papers on process technology, semiconductor device reliability and performance. He also holds over 10 patents in the field of semiconductor technology.

Vivek received his bachelor’s degree in Chemical Engineering from the Indian Institute of Technology Delhi, a master’s degree in Chemical Engineering from Penn State University, and a master’s degree in Electrical Engineering from Stanford University. He is also a 2014 graduate of the Stanford Graduate School of Business Executive Program.
Anelise Sacks is Executive Vice President and Chief Customer Officer at ADI. She is responsible for the company's customer strategy, enabling frictionless delivery of ADI's cutting-edge solutions to a diverse, global customer base, and delivering and capturing value for ADI's technology. She oversees the company’s global sales, solutions and ecosystems, marketing, and digital transformation, with a focus on delivering a superior end-to-end customer experience and expanding ADI’s go-to-market strategies across channels and ecosystems.

Anelise joined ADI in 2021. Previously, she served in a variety of leadership roles for Texas Instruments where she grew their portfolio of analog, digital, and software technologies. During her 15-year tenure, she was responsible for investment strategy, product roadmap definition, new product and technology development, marketing, systems, and application engineering. Prior to joining Texas Instruments, Sacks worked as a research and development engineer at Bosch.

Anelise brings a diverse blend of expertise across geographies, technologies, and functions including sales and business unit leadership. She has lived on three continents and speaks five languages. She holds an electric and electronic engineering degree from the Federal University in Rio de Janeiro. She also holds an MBA with merit from the Open University Business School in the U.K. and has continued her executive education at Harvard Business School and INSEAD. Sacks has been named a Fellow of the International Women’s Forum (IWF) and is a recipient of the Dallas Business Journal’s “Women in Technology” award.
As Senior Vice President, Chief Legal Officer, and Corporate Secretary of ADI, Janene Asgeirsson leads the worldwide legal, governance, trade and compliance functions, and acts as a strategic advisor to ADI’s executive leadership team and board of directors. She is also responsible for ADI’s risk functions, including internal audit, in her capacity as Chief Risk Officer, and for the regulatory, risk, audit and governance aspects of ADI’s environmental, social and governance (ESG) programs.

Janene has over two decades of experience in private practice at American Lawyer-ranked international law firms and publicly traded technology companies. Prior to joining ADI in August 2021, Janene served as the chief legal officer, chief compliance officer and secretary at Acacia Communications, leading global teams with diverse responsibilities. During her six years at Acacia, she accomplished several significant strategic projects and transactions, including Acacia’s initial public offering (IPO) – the best-performing U.S. IPO of 2016 – and its $4.5 billion sale to Cisco Systems. Prior to Acacia, Janene engaged in private practice at WilmerHale and served as senior counsel at Entropic Communications, a provider of semiconductor solutions, which was acquired by MaxLinear in 2015.

Janene holds a Juris Doctor from Northeastern University School of Law and a Bachelor of Arts in accountancy from the University of San Diego, where she graduated summa cum laude. Janene is a member of the State Bars of Massachusetts, New York and California.

Janene serves as the Secretary of ADI’s Board of Directors and as a director of several of ADI’s global subsidiaries. From 2015 to 2021, she served as a director on the Franklin Performance Arts Company.
As Chief Technology Officer, Alan Lee develops and leads ADI’s long-term technology strategy for applications across the company’s end markets, working closely with ADI’s global business units and manufacturing operations to drive ADI’s competitive advantage. Alan is responsible for identifying, sourcing, and cultivating new business, technology, and research opportunities, as well as developing foundational technology capabilities in support of the current and future needs of our markets and customers.

Alan is a highly accomplished executive with over 20 years of experience in the technology industry. Most recently he served as the Corporate Vice President of Research and Advanced Development at AMD. During his tenure at the company, he founded AMD Research where he oversaw the company’s worldwide research and advanced technology labs, university engagements, and external research contracting. Alan also led extreme-scale computing technology at AMD, where he drove the software and hardware engineering efforts to build the world’s fastest platforms for machine learning, industrial, and scientific applications.

Previously, Alan was CEO of a privately held company creating technologies for high-frequency trading and quantitative financial analysis. Moreover, he developed expertise in large-scale, multinational engineering and technology projects through his previous work at Intel and IBM.

Alan currently chairs the CTO Committee for the Semiconductor Industry Association (SIA) and the CTO Council for the Global Semiconductor Alliance (GSA). He has served on the Board of Directors for the Semiconductor Research Corporation and the Board of Trustees for the NSF Institute for Pure and Applied Mathematics. An ardent supporter of education, he also volunteers his time to multiple non-profit educational programs.
As Senior Vice President and Chief People Officer, Mariya Trickett is responsible for supporting ADI’s growth and evolution, driving best practices across all aspects of human resources. In this role, she leads the human resources and talent functions, including employee engagement, talent acquisition, talent management, learning and development, total rewards, succession planning, and organizational development.

For nearly 20 years, Mariya has successfully led business and cultural transformations across a wide range of organizations. She has extensive experience building global high-performance companies focused on innovation, agility, and customer-centricity across technology, software, R&D, manufacturing, and services.

Mariya came to ADI from Aptiv, a $15 billion mobility and EV industrial-tech company with over 180,000 employees, spanning 44 countries and 221 sites, where she served as chief human resources officer and senior vice president. Prior to Aptiv, she was chief human resources officer and senior vice president at Dana, an $8 billion drive train and EV supplier with more than 35,000 employees. She began her career in software at SAP.

Mariya holds a Bachelor of Science degree in history and law from Kirovograd State University in Ukraine and a Master of Science degree in human resource management from Temple University in Philadelphia. She is also a graduate of the Advanced Management Program at the University of Navarra’s IESE Business School in Barcelona.
BOARD OF DIRECTORS AS OF MARCH 8, 2023 ANNUAL MEETING

RAY STATA
DIRECTOR AND CO-FOUNDER OF ANALOG DEVICES, INC.

EDWARD H. FRANK
EXECUTIVE CHAIR OF GRADIENT TECHNOLOGIES

KENTON J. SICCHITANO
FORMER GLOBAL MANAGING PARTNER OF PRICEWATERHOUSECOOPERS LLP

VINCENT ROCHE
CHIEF EXECUTIVE OFFICER AND CHAIR OF THE BOARD OF DIRECTORS ANALOG DEVICES, INC.

LAURIE H. GLIMCHER
PROFESSOR OF MEDICINE AT HARVARD MEDICAL SCHOOL AND PRESIDENT AND CHIEF EXECUTIVE OFFICER OF THE DANA-FARBER CANCER INSTITUTE

SUSIE WEE
FORMER VICE PRESIDENT AT GOOGLE

JAMES A. CHAMPY
FORMER VICE PRESIDENT OF THE DELL/PEROT SYSTEMS BUSINESS UNIT OF DELL, INC.

KAREN M. GOLZ
FORMER GLOBAL VICE CHAIR OF ERNST & YOUNG

ANDRÉ ANDONIAN
CHIEF EXECUTIVE OFFICER OF ANDONIAN ADVISORY PTE. LTD. & SPECIAL ADVISOR – SENIOR PARTNER EMERITUS AT MCKINSEY & COMPANY

ANANTHA P. CHANDRAKASAN
DEAN OF MIT’S SCHOOL OF ENGINEERING AND VANNEVAR BUSH PROFESSOR OF ELECTRICAL ENGINEERING AND COMPUTER SCIENCE

MERCEDES JOHNSON
FORMER CHIEF FINANCIAL OFFICER OF AVAGO TECHNOLOGIES (NOW BROADCOM INC.)
We continue to refresh the Board’s membership to ensure that it maintains the right mix of skills, experience, tenure and diversity to oversee ADI’s business and strategy.

**EXECUTIVE LEADERSHIP - 6**
- Experienced leadership of complex global businesses

**INDUSTRY - 9**
- Insight into key issues affecting ADI

**INNOVATION & EMERGING TECHNOLOGIES - 9**
- Expertise and thought leadership relating to technological innovation in our industry and our end markets

**CORPORATE GOVERNANCE/ PUBLIC COMPANY BOARD - 7**
- Knowledge of public company governance issues and policies to enhance Board practices

**FINANCIAL, ACCOUNTING, AUDITING - 3**
- Oversight of ADI’s audit function and preparation of financial statements and capital market expertise

**INTERNATIONAL, LARGE SCALE GLOBAL OPERATIONS, MANUFACTURING - 9**
- Insight into the many factors involved in overseeing management of ADI’s global footprint

**GOVERNMENT AFFAIRS, PUBLIC POLICY - 3**
- Expertise handling government affairs and public policy matters

**STRATEGY - 10**
- Oversight of management’s development and implementation of strategic priorities

**RISK MANAGEMENT, REGULATORY, COMPLIANCE - 2**
- Oversight of risks facing ADI and a comprehensive approach to risk management

**CYBERSECURITY, INFORMATION SYSTEMS - 4**
- Oversight of ADI’s efforts to maintain our customers’ trust and protect the security of their data

**Mergers & Acquisitions - 4**
- Experience evaluating strategic transactions

**ESG - 3**
- Knowledge of ESG topics (including Sustainability, Human Capital, and Diversity) impacting ADI.

Reconciliation of Non-GAAP Forward-Looking Estimates

This presentation contains forward-looking estimates of non-GAAP measures including adjusted gross margin, adjusted operating margin, free cash flow margin, free cash flow return, and adjusted earnings per share. We are unable to provide a reconciliation of the above-listed forward-looking estimates of non-GAAP measures because certain information needed to make a reasonable forward-looking estimate of the comparable GAAP measure is difficult to predict and estimate and is often dependent on future events that may be uncertain or outside of our control. Such events may include unanticipated changes in our GAAP effective tax rate and related tax items, unanticipated acquisition-related expenses and transaction costs and impairments, unanticipated losses on extinguishment of debt, and other unanticipated special charges. The probable significance of the unavailable information is unknown. Our forward-looking estimates of both GAAP and non-GAAP measures of our financial performance may differ materially from our actual results and should not be relied upon as statements of fact.
